**Systems** Tushar K. Ghosh,Mark A. Prelas,2009-06-04 In the lifetimes of the authors the world and especially the United States have received three significant wake up calls on energy production and consumption The first of these occurred on October 15 1973 when the Yom Kippur War began with an attack by Syria and Egypt on Israel The United States and many western countries supported Israel Because of the western support of Israel several Arab oil exporting nations imposed an oil embargo on the west These nations withheld five million barrels of oil per day Other countries made up about one million barrels of oil per day but the net loss of four million barrels of oil production per day extended through March of 1974 This

represented 7% of the free world's i.e. excluding the USSR oil production. In 1972 the price of crude oil was about 3.00 per barrel and by the end of 1974 the price of oil had risen by a factor of 4 to over 12.00. This resulted in one of the worst recessions in the post World War II era. As a result there was a movement in the United States to become energy independent. At that time the United States imported about one third of its oil about five million barrels per day. After the embargo was lifted the world chose to ignore the wake up call and went on with business as usual. Energy Resources and Systems Tushar Ghosh, Mark Prelas, 2009-06-17. In the lifetimes of the authors the world and especially the United States have received three significant wake up calls on energy production and consumption. The first of these occurred on October 15, 1973 when the Yom Kippur War began with an attack by Syria and Egypt on Israel. The United States and many western countries supported Israel. Because of the western support of Israel several Arab oil exporting nations imposed an oil embargo on the west. These nations withheld five million barrels of oil per day. The objective of the text is to explain and demonstrate the principles and techniques of engineering economic analysis as applied in different fields of engineering. This brief text includes coverage of multiple attribute evaluation for instructors who want to include non-economic dimensions in alternative evaluation and the discussion of risk considerations in the appendix compared to Blank's comprehensive text where these topics are discussed in two unique chapters. *Official Gazette* Philippines, 2008.
