Risk in Extreme Environments Vicki M. Bier,2017-10-19

Risk in Extreme Environments presents a wide ranging discussion of approaches for assessing and managing extreme risks. Extreme events are not only severe but also outside the normal range of experience of the system in question and can include environmental catastrophe, engineering failure, financial or business meltdown and nuclear or other extreme terrorism. The book focuses on synthesizing research results in a way that provides insights useful to decision makers and enables them to ask probing questions about the risks faced by their organizations, identify creative solutions and minimize the neglect of extreme risks that can come from a focus on mundane or ordinary management challenges. The book details case studies on nuclear power, infectious diseases and global catastrophic risks in addition to sections on risk assessment, risk management and risk perceptions. Since effective management benefits from an interdisciplinary perspective, the chapter authors include experts in economics, engineering, geography, law, political science, psychology, sociology and science in addition to risk analysis. Risk in Extreme Environments is an accessible and valuable resource for risk managers and other decision makers responsible for large complex business and government decisions while also providing enough detail and references to be informative for risk analysts interested in learning more about technical aspects of the various methods.

The Intellectual Structure of Sustainability A M M Maruf Hossain, 2025-03-31. This research monograph creates human intellectual capability for the production of sound knowledge regarding things, realities in their totalities as the production of such knowledge, termed here as integrated knowledge, is imperative for the provision of an effective intellectual treatment of sustainability. The research that is presented here is composed of five consecutive parts where Part I constructs a novel intellectual process that aims to produce integrated knowledge regarding a sample thing, reality. This is followed by Parts II-IV having thoroughly tested this intellectual process in regard to this capacity. Part V brings the key contributions of Parts I-IV together, resulting in the production of the theory of integrated knowledge creation which is formed here on the basis of the production of sound knowledge regarding the given thing, reality in its totality. As such, the formation of this theory unearths the foundation of a new avenue of knowledge, termed here as the scholarship of sustainability.

education of future Integer Programming and Related Areas C. Kastning, 2013-11-11 Integer Programming is one of the most fascinating and difficult areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have been made in very different branches of mathematics and its applications Since these publications are scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however tried to be as complete as possible The bibliography contains 4704 different publications by 6767 authors which were classified by 11839 descriptor entries
