proposes a paradigm change from the systemic VIEW to systems SCIENCE so as to extend the methodology of conventional science of physics into the domains hitherto beyond the reach of this kind of treatment The book I Identifies the problematic issues in current approaches to the systemic or structural view of parts of the world as opposed to the quantitative qualitative views of conventional science of physics and the arts whereby introducing the third culture II Locates the position of the structural view in the context of human intellectual endeavour III Discusses the fundamental questions raised by modelling aspects of human behaviour IV Introduces the basic ideas and the symbolism of linguistic modelling which are then applied to turning descriptions of scenarios as a story or narrative into reasoning schemes V Describes a methodology of problem solving of which design thinking and the operation of purposive systems are seen as essential ingredients Problem solving is a universal activity of living in particular human beings through innovation invention and creativity Lack of this activity leads to death Problem solving is regarded as pivotal point which may propel the spread of the modified structural view into social technical cultural and educational awareness VI Shows the location of aspects of conventional science within

the scheme of systems science whereby achieving a continuity of the scientific endeavour VII Outlines a teaching scheme for linguistic modelling Janos Korn explains how a view can be converted into a science which can lead to a possibility of organised speculation or simulation of behaviour exploring the effects of variation of parameters on performance and the occurrence of outcomes of operations beneficial or not of dynamic structures Static and dynamic structures are expressed in more rigorous and computable terms so that the results of analysis and design of human activity scenarios could be exposed to at least thought experiments Linguistic Modelling of Scenarios is an informative read for any professionals teachers and students of engineering social science management business and production **The Environment Index** ,1983
