placed on learning to or through design in school How should design be assessed within formal education Where and when is design best incorporated into education In posing these questions the goal of this research topic is to provide scholarly discourse which supports critical reflection and the challenging of assumptions regarding design in education Beyond Age Effects in Instructional L2 Learning Simone E. Pfenninger, David Singleton, 2017-04-21 This book constitutes a holistic study of how and why late starters surpass early starters in comparable instructional settings Combining advanced quantitative methods with individual level qualitative data it examines the role of age of onset in the context of the Swiss multilingual educational system and focuses on performance at the beginning and end of secondary school thereby offering a long term view of the teenage experience of foreign language learning The study scrutinised factors that seem to prevent young starters from profiting from their extended learning period and investigated the mechanisms that enable late beginners to catch up with early beginners relatively quickly Taking account of contextual factors individual socio affective factors and instructional factors within a single longitudinal study the book makes a convincing case that age of onset is not only of minimal relevance for many aspects of instructed language acquisition but that in this context for a number of reasons a later onset can be beneficial **Tappi Journal** ,1998 *HSC Advanced English* Barry Spurr, 2009 This guide contains an introduction to the new course plus exam tips comprehensive summary and discussion of each text in the Advanced English course including Area of Study and Advanced English Modules a list of key issues to consider in each chapter related to the relevant syllabus area helpful advice on how to read different types of texts and plot outlines character discussion and interpretations Publisher description
