

Genetics Practice Problems: Pedigree Tables

Remember the following when working pedigree tables:

- 1. Circles are females and squares are males.
- 2. A shaded circle or square indicates that a person has the trait.

The pedigree chart below is the inheritance of color blindness. Shaded individuals are colorblind. First, determine the probable genotype of person 1-15. Then answer the questions below the table.

What do you know about the genotype of the mother of 1-1?

These parents (1-1 and 1-2) had a color-blind son (1-4). His dad has no recessive, but color-blind allele. From his mother, since the mother is not shaded, she must be a carrier.

Number 1-5 is colorblind just like her father. Where could she get her allele for colorblindness?

She inherited her allele for colorblindness from her mother. Must have been that 1-2's wife was a carrier. From their father.

Number numbers 1-7 and 1-8 were colorblind. How did they have a colorblind son (1-12)?

Both mother and father are carriers for colorblindness.

What must be the genotype of the parents of a colorblind daughter? Explain.

To have a color-blind daughter, she must have the recessive allele from each parent. Her father must be X^bY and mother must have at least X^{bb} or X^{Bb} .

If mother 1-1 has a normal son, what is the probability that their son will be colorblind?

$X^{Bb} \times X^BY \rightarrow$ all of their sons will have colorblindness.

(Normal male)

Choose A Healthy Puppy or Kitten Emma Milne, 2018-11-02 Getting a new puppy or kitten is such an exciting time for any family and should be the start of a beautiful long friendship Picking a breed can be difficult and is sometimes a choice made on an impulse because a certain look or character seems to be just what you want Sadly a snap decision can turn into heartache if the breed you pick doesn't suit your lifestyle or has health issues that you didn't know about Some breeds of dogs and cats have body shapes that are not healthy and can cause a lifetime of discomfort Selective breeding has produced features like short faces tiny legs long backs huge ears and lots of skin wrinkles Some breeds also have high levels of inherited disease like heart problems These unnatural exaggerations and inherited issues can not only mean big bills and frequent visits to the vet but also a less than ideal life for your pet This book will help you avoid the breeds most affected by health problems We look at what Mother Nature and evolution picked for cats and dogs compared to what man has done through breeding Hopefully you will start to see these odd body shapes not as normal for a breed but as unhealthy changes to our beautiful cats and dogs We'll also look at how you can try to find the best breeder possible and avoid the likes of puppy farmers who care more about money than their animals Somewhere out there a puppy or kitten is waiting to become a cherished part of your family and I hope this book will help you find the right one Dogs and cats are wonderful animals and enrich our lives so let's try and make sure that they are as healthy and happy as possible 5m Books
