Geography For Global Citizens 2nd Edition:

Schooling for Sustainable Development: Margaret Robertson, 2012-03-14 This book *Schooling for Sustainable Development A Focus on Australia New Zealand and the Oceanic Region* is the product of passionate interests of teachers scholars and researchers located in diverse parts of the Australasian region Working with their colleagues within local contexts they have conducted research and gathered together information for practitioners and students interested in learning more about sustainable lifestyle practices Some of the work has taken place in remote locations and some has been in within the confines of major cities The Australasian Region brings together people and cultures that link traditional economies to global networks and lifestyles Diverse terrain politics and responses typify the region Close to Asia there are lingering ties with old European ways and cultural beliefs The major economies of Australia and New Zealand provide the lead with development practices for lesser economies such as Papua New Guinea Fiji and the many island nations scattered throughout the South Pacific This complexity is not easily represented Key issues relate to land ownership mobilities within the region and the gradual dissemination of knowledge skills and wealth The book will provide both reference material and interesting reading for teachers researchers and practitioners in interested in community based perspectives on sustainability We have learnt from each other and hope that others will benefit from our efforts Global Citizenship and the University Robert Rhoads, Katalin Szelényi, 2011-05-04 With the increasing integration of global economies and societies the nation state is no longer the sole force shaping and defining citizenship New ideas of global citizenship are emerging and universities which are increasingly involved in international engagements provide a unique opportunity to explore how fundamental understandings of modern citizenship are changing Drawing on case studies of universities in China the United States Hungary and Argentina *Global Citizenship and the University* moves beyond a narrow political definition of citizenship to address the cultural and economic complexities of contemporary social life Rhoads and Szel nyi show how universities should be mindful of the possibilities for faculty and student involvement in the production management and application of knowledge and how this in turn allows for an engagement as citizens that reflects serious considerations of the global context Ultimately the authors challenge universities and readers alike to consider the many transnational opportunities that are redefining citizenship today *Character Compass, Second Edition* Scott Seider, Shelby Clark, Madora Soutter, 2025-10-29 The popular volume on the power of character development in the classroom now features new chapters on intellectual risk taking and open mindedness plus reflections from leaders and former students of the participating schools on the impact of character education on their work and lives *Character Compass Second Edition* returns to three high performing urban schools to reassess their distinct commitments to character education Classical Academy prizes moral character College Bound Middle School emphasizes performance character and Civitas Prep prioritizes civic character To this group Scott Seider Shelby Clark and Madora Soutter add Bright Ideas Middle School which champions intellectual character They

describe the ways in which these four school s distinctive character goals lead them to emphasize different programming and practices and to nurture different dimensions of their students characters Seider Clark and Soutter reconnect with the students that were interviewed more than a decade ago to ask how character education influenced their trajectories and they invite the volume s original school leaders to share how their thinking has and has not changed Their research reaffirms the foundational strength of character education in building a powerful school culture where students can thrive and a new case study on a school emphasizing intellectual character broadens the framework s reach With its rare longitudinal and retrospective perspective Character Compass Second Edition provides K 12 educators and school leaders with powerful guidance for making character development central to their mission of supporting student success Updates also help practitioners hone their chosen approach to best complement their own unique institutional commitments community and context

False Promise of Global Learning Alex Standish, 2012-04-26 Provides an informed and impassioned critique of the movement for international and global education in schools **Introduction to International and Global Studies, Second Edition**

Shawn C. Smallman, Kimberley Brown, 2015-01-05 This innovative introduction to international and global studies updated and revised in a new edition offers instructors in the social sciences and humanities a core textbook for teaching undergraduates in this rapidly growing field Encompassing the latest scholarship in what is a markedly interdisciplinary endeavor Shawn Smallman and Kimberley Brown introduce key concepts themes and issues and then examine each in lively chapters on essential topics that include the history of globalization economic political and cultural globalization security energy and development health agriculture and food and the environment Within these topics the authors explore such timely and pressing subjects as commodity chains labor including present day slavery human rights multinational corporations and the connections among them New to this edition The latest research on debates over privacy rights and surveillance since Edward Snowden s disclosures Updates on significant political and economic developments throughout the world including a new case study of European Union Icelandic and Greek responses to the 2008 fiscal crisis The newest information about the rise of fracking the Fukushima nuclear disaster the decline of the Peak Oil movement and climate change including the latter s effects on the Arctic and Antarctica A dedicated website with authors blog and a teaching tab with syllabi class activities and well designed classroom tested resources An updated teacher s manual available online including sample examination questions additional resources for each chapter and special assistance for teaching ESL students Updated career advice for international studies majors Global Citizenship Education , 2008-01-01 The essays in this edited collection argue that global citizenship education realistically must be set against the imperfections of our contemporary political realities As a form of education it must actively engage in a critically informed way with a set of complex inherited historical issues that emerge out of a colonial past and the savage globalization which often perpetuates

unequal power relations or cause new inequalities The essays in the book explore these issues and the emergent world ideologies of globalism as well as present territorial conflicts ethnic tribal and nationalist rivalries problems of increasing international migration and asylum growing regional imbalances and increasing world inequalities Contributors to this collection each on their own way argues that global citizenship education needs to project new values to reality test and debate the language concepts and theories of global citizenship and the proto world institutions that seek to give expression to nascent aspirations for international forms of social justice and citizen participation in world government Many of the contributors argue that global citizenship education offers the prospect of extending the liberal ideologies of human rights and multiculturalism and of developing a better understanding of forms of post colonialism One thing is sure as the essays presented in this book demonstrate so clearly there can be no one dominant notion of global citizenship education as notions of global citizenship and education are all contested and open to further argument and revision Global citizenship education does not name the moment of global citizenship or even its emergence so much as the hope of a form of order where the rights of the individual and of cultural groups irrespective of race gender ethnicity or creed are observed preserved and protected by all governments in order to become the basis of citizen participation in new global spaces that we might be tempted to call global civil society
