Lessons in Teaching Computing in Primary Schools James Bird, Helen Caldwell, Peter Mayne, 2014-07-18 Lesson planning in line with the new Primary National Curriculum This book goes much further than explaining to teachers the knowledge that the new computing curriculum requires It is about teaching and learning rather than simply teaching computing as an academic subject The new computing curriculum is explored in manageable chunks and there is no scary language everything is explained clearly and accessibly You will find example lesson plans alongside every element of the curriculum as support and inspiration when planning your own lessons It inspires an approach to teaching computing that is about creativity and encouraging learners to respond to challenges and problems using technology as a tool Ideas for taking the lesson further assessment and reflective questions for you are also included after each lesson Did you know that this book is part of the Lessons in Teaching series Table of Contents Algorithms and computational thinking in Key Stage 1 Programming in KS1 Manipulating digital data in KS1 Programming in KS2 Physical Computing in KS2 Understanding computer networks in KS2 Searching wisely for digital information in KS2 Adam Scribbans Using technology purposefully in KS2 Extending computing to meet individual needs in KS2 Sway Grantham and Alison Witts Embedding computational thinking moving from graphical to text based languages Mark Dorling WHAT IS THE LESSONS IN TEACHING SERIES Suitable for any teacher at any stage of their career the books in this series are packed with great ideas for teaching engaging outstanding lessons in your primary classroom The Companion Website accompanying the series includes extra resources including tips lesson starters videos and Pinterest boards Visit www.sagepub.co.uk/lessonsinteaching Books in this series Lessons in Teaching Grammar in Primary Schools Lessons in Teaching Computing in Primary Schools Lessons in Teaching Number and Place Value in Primary Schools Lessons in Teaching Reading Comprehension in Primary Schools Lesson in Teaching Phonics in Primary Schools

Learning and Teaching for Mathematical Literacy Hugh Burkhardt, Daniel Pead, Kaye Stacey, 2024-02-19 Typically most people don't realize when and how they can use the mathematics they were taught in high school yet many of the mathematical ideas and skills can be a powerful tool for understanding how the world works Learning and Teaching for Mathematical Literacy addresses this situation offering practical strategies for developing a broader vision of mathematical literacy in the classroom and recognising the importance of maintaining these skills into adult life Linked to the material explored throughout this book

classroom activities and lesson materials are freely available for use via the QR codes included in each chapter Filled with case studies and classroom activities chapters tackle several topics Describing a framework for a broader vision of mathematical literacy what is it and why is it important Teaching mathematical literacy in the classroom Applying mathematical literacy to real life scenarios My dad is buying a new dishwasher Should he buy the extended warranty on offer My phone works fine but I ve been offered an upgrade How should I decide whether to take it The role of technology in teaching mathematical literacy Designing mathematical measures for real word quantities Firmly grounded by practical applications for the classroom and beyond this is an essential handbook for any teacher teaching assistant or mathematics subject lead who wishes to develop their students mathematical literacy skills This is also an ideal resource for those delivering or enrolled in teacher preparation courses

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in

their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans
