Name _____ Date _____

Hale and Bopp

On the night of July 23, 1846, a man named Thomas Bopp was observing the night sky to discover through a telescope. He had already examined the sky with his telescope. Bopp noticed a faint glow that he had never seen before. He asked a friend who was with him to look at the new object. They found the new object almost to gaze. But the glow was not on the chart.

The day was night in New Mexico. How could a new object be seen in the night sky through his telescope, as he often did?

It was a very clear night. Hale looked up with his telescope at a part of the sky he had been studying a few weeks earlier. Suddenly, he caught a glimpse. He had spotted something new. Hale had seen a faint, fuzzy glow. He had seen a small streak of light he saw. He believed he had just found a comet.

Hale was shocked by the new object. Like Bopp, he did not find the object on his chart. Hale sent a message to a friend in Massachusetts that news of his comet. He told the people of the comet what he had seen.

Thomas Bopp also sent a message to the center in Massachusetts. The next morning, he heard back from the center. Bopp, like Hale, had discovered a new comet.

Twelve hours after Hale and Bopp had first seen the comet, it had a name: Comet Hale-Bopp.
