C++20 for Programmers Paul Deitel, Harvey Deitel, 2022-03-31 The professional programmer's Deitel guide to C++20. Written for programmers with a background in another high level language in this book you'll learn Modern C++ development hands on using C++20 and its Big Four features: Ranges, Concepts, Modules, and Coroutines. For more details see the Preface and the table of contents diagram inside the front cover. In the context of 200 hands-on real world code examples you'll quickly master Modern C++ coding idioms using popular compilers: Visual C++, GNU g++, Apple Xcode, and LLVM Clang. After the C++ fundamentals quick start you'll move on to C++ standard library containers: array and vector, functional style programming with C++20 Ranges and Views, strings, files, and regular expressions, object oriented programming with classes, inheritance, runtime polymorphism, and static polymorphism, operator overloading, copy move semantics, RAII, and smart pointers, exceptions, and a look forward to C++23. Contracts, standard library containers, iterators, and algorithms, templates, C++20 Concepts, and metaprogramming, C++20 Modules, and large scale development and concurrency, parallelism, the C++17 and C++20 parallel standard library algorithms, and C++20 Coroutines. Features: Rich coverage of C++20's Big Four: Ranges, Concepts, Modules, and Coroutines. Objects: Natural Approach. Use standard libraries and open source libraries to build significant applications with minimal code. Hundreds of real world live code examples. Modern C++ C++20 17 14 11 and a look to C++23. Compilers: Visual C++ GNU g++ Apple Xcode Clang LLVM Clang Docker GNU GCC LLVM Clang. Fundamentals: Control statements, functions, strings, references, pointers, files, exceptions. Object oriented programming: Classes, objects, inheritance, runtime and static polymorphism, operator overloading, copy move semantics, RAII, smart pointers. Functional style programming: C++20 Ranges and Views, lambda expressions. Generic programming: Templates. C++20 Concepts and metaprogramming. C++20 Modules. Large Scale Development: Concurrent programming, Concurrency, multithreading, parallel algorithms. C++20 Coroutines: coroutines, support libraries. C++23: executors, Future, A look forward to Contracts, range based parallel algorithms, standard library coroutine support, and more. C++20 for Programmers builds up an intuition for modern C++ that every programmer should have in the current software engineering ecosystem. The unique and brilliant ordering in which the Deitels present the material jibes much more naturally with the demands of modern production grade programming environments. I strongly recommend this book for anyone who needs to get up to speed on C++ particularly in professional programming environments where the idioms and patterns of modern C++ can be indecipherable without the carefully crafted guidance that this book provides. Dr. Daisy Hollman, ISO C Standards Committee Member. This is a fine book that covers a surprising amount of the very large language that is C++20. An in-depth treatment of C++ for a reader familiar with how things work in other programming languages. Arthur O'Dwyer, C++ trainer, Chair of CppCon's Back to Basics track, author of several accepted C++17, 20, 23 proposals, and the book *Mastering the C++17 STL*. Forget about callback functions, bare pointers, and proprietary multithreading libraries. C++20 is about standard concurrency features, generic lambda expressions, metaprogramming, tighter type safety, and the long-awaited

concepts which are all demonstrated in this book Functional programming is explained clearly with plenty of illustrative code listings The excellent chapter Parallel Algorithms and Concurrency A High Level View is a highlight of this book Danny Kalev Ph D and Certified System Analyst and Software Engineer Former ISO C Standards Committee Member Register your book for convenient access to downloads updates and or corrections as they become available See inside book for details Note eBooks are 4 color and print books are black and white [Mastering HTML and XHTML](#) Deborah S.
