The purpose of this paper is to think of a particular time in my childhood and apply Brothertiness's five systems to that particular time. Erie Brothertiness's ecological theory in child development suggest that five levels of the environment simultaneously influences us as children. Frontbencher believes that we cannot fully understand the phenomenon of continuity and bio-psychological characteristics of a child without considering how we are influence by each level of our environment.

The particular time period in my childhood that I would like to discuss in this essay is when I was about 10 years old. I chose this time period due to the fact that this was a time when life changed for my family and me in more ways than one, in some ways positive but in many ways negative. The most serious impact on my life occurred at the age of 10 years old, which I will be discussing in detail further on in this essay.

At about age 10 I developed a love for track and field and went on to win numerous medals in school which is a personal success story of mine. In this peri
