

Creating Your "Human Systems" Person

Directions: You have creative license in designing a "multilayered" person that shows all the systems in the human body. So far we have studied the Digestive System; next we will study the Nervous System. Each system is worth 10 points and this assignment is due at the end of the final unit.

Page #1: Coversheet: Outline of Your Person

- ☐ Title: SYSTEMS OF THE HUMAN BODY
- ☐ Name, Date, Period
- ☐ Use color for title, BE NEAT!

Each Page will include the following:

- ☐ Title: Name of System at top of page
- ☐ Include all parts/organs of the system!
- ☐ Summary of what the system is responsible for on the bottom or side of the paper
- ☐ Use color for title and system, BE NEAT!

Below are the pages you will create:

- Page #2:** Digestive System (trace person on coversheet)
- Page #3:** Nervous System (trace person on coversheet)
- Page #4:** Immune System (trace person on coversheet)
- Page #5:** Circulatory/Respiratory System (trace person on coversheet)
- Page #6:** Endocrine System (trace person on coversheet)
- Page #7:** May end with more systems.

Contains easy instructions for making twenty models manipulatives and mini books that will teach students in grades two through four about the human body

Multiple Representations in Biological Education David F. Treagust, Chi-Yan Tsui, 2013-02-01 This new publication in the Models and Modeling in Science Education series synthesizes a wealth of international research on using multiple representations in biology education and aims for a coherent framework in using them to improve higher order learning Addressing a major gap in the literature the volume proposes a theoretical model for advancing biology educators notions of how multiple external representations MERs such as analogies metaphors and visualizations can best be harnessed for improving teaching and learning in biology at all pedagogical levels The content tackles the conceptual and linguistic difficulties of learning biology at each level macro micro sub micro and symbolic illustrating how MERs can be used in teaching across these levels and in various combinations as well as in differing contexts and topic areas The strategies outlined will help students reasoning and problem solving skills enhance their ability to construct mental models and internal representations and ultimately will assist in increasing public understanding of biology related issues a key goal in today s world of pressing concerns over societal problems about food environment energy and health The book concludes by highlighting important aspects of research in biological education in the post genomic information age

The New Smart Terry Roberts, Ph.D., 2019-11-26 In their world neither static definitions of intelligence nor traditional ideas of training stand us in good stead Rather we need to reframe the question given what lies before us and come to terms with a different answer posited in different language This then are those who will thrive in the 21st Century They will blend multiple intelligences in a way that might be described as synthetic or even symphonic They will be ambitious and focused without being self obsessed They will value asynchrony and even seek it out They will use their own marginality to generate novel perspective and new work They will exhibit a steadfast resilience in all phases of life They will be measured by what they produce over the course of a lifetime not by any static notion of capacity or quotient In the fractured environment of the 21st century true success will be unique and unexpected the result of a creative response to complex shifting challenges So how do we prepare How do we educate ourselves and our children for life in 2050
