Firth, J. R. S. Hoult, 1980 **The Basics of Reproduction** Anne Wanjie, 2013-07-15 This text offers readers a comprehensive study of animal and plant reproduction that is aligned with the Common Core curriculum standards for science Readers learn about sexual and asexual reproduction how the pollination process works vertebrate and invertebrate reproduction Darwin s theories on evolution and the life cycles of different species Further they are introduced to the mechanics of reproduction including the passage of genetic information from parent to offspring cell division and the structure of DNA Human reproduction is also covered with topics including the male and female reproductive systems conception pregnancy the stages of labor as well as human development from birth to death Finally a biography of geneticist Barbara McClintock is featured which adds a unifying theme to the overall study of reproduction and how traits are passed from one generation to the next The eye catching imagery and diagrams of this dynamic resource make the topic approachable yet authoritative

**Human Reproductive Biology** Richard Evan Jones, 1991-08-28 Human Reproductive Biology focuses on the processes concerns and trends in human reproduction Divided into four parts with 19 chapters the book starts by tracing the history of human reproduction biology and the questions and choices involved The first part focuses on the male and female reproductive systems The text notes the different organs involved in reproduction including the penis scrotum vagina oviducts and mammary glands The book discusses sexual development and differentiation particularly noting the variance of sex ducts and glands external genitalia and disorders of sexual development and determination The text also looks at puberty Concerns include gonadal changes from birth to puberty mechanisms that influence puberty and puberty and psychosocial adjustment The second part deals with menstrual

cycle fertilization pregnancy labor and birth Some of the concerns include length of menstrual cycle absence of menstruation transport of sperm and ovum in the oviduct and semen release The text also highlights labor and birthing processes as well as the relationship of neonates and parents The third part looks at the medical aspects of human reproduction infertility and sexually transmitted diseases Concerns include contraception abortion herpes genitalis and vaginitis The text folds with discussions on human sexual behavior population growth and family planning Concerns include sexual dysfunction the effects of overpopulation and population control The book is a vital source of data for readers interested in human reproduction

**Biology of Human Reproduction** World Health Organization, 1964-01-01      **Human Reproduction; Biology and Social Change** Harold D. Swanson, 1974      *On Fertile Ground* Peter Thorpe ELLISON, Peter Thorpe Ellison, 2009-06-30

Reproduction is among the most basic of human biological functions both for our distant ancestors and for ourselves whether we live on the plains of Africa or in North American suburbs Our reproductive biology unites us as a species but it has also been an important engine of our evolution In the way our bodies function today we can see both the imprint of our formative past and implications for our future It is the infinitely subtle and endlessly dramatic story of human reproduction and its evolutionary context that Peter T Ellison tells in *On Fertile Ground* Ranging from the latest achievements of modern fertility clinics to the lives of subsistence farmers in the rain forests of Africa this book offers both a remarkably broad and a minutely detailed exploration of human reproduction Ellison a leading pioneer in the field combines the perspectives of anthropology stressing the range and variation of human experience ecology sensitive to the two way interactions between humans and their environments and evolutionary biology emphasizing a functional understanding of human reproductive biology and its role in our evolutionary history Whether contrasting female athletes missing their periods and male athletes using anabolic steroids with Polish farm women and hunter gatherers in Paraguay or exploring the intricate choreography of an implanting embryo or of a nursing mother and her child *On Fertile Ground* advances a rich and deeply satisfying explanation of the mechanisms by which we reproduce and the evolutionary forces behind their design

**Biology of Human Reproduction** World Health Organization. Scientific Group on the Biology of Human Reproduction, 1964      **Human Reproduction** L. M. Baggott, 1997-02-20 Concise introductory textbook examining human reproduction for advanced school and beginning university students      *A Guide to Reproduction* Irina Pollard, 1994-06-23 The purpose of this comprehensive text is to increase awareness of human reproduction and its consequences The central theme links reproductive capacity the social consequences of the multiple stresses this places on the environment and the ways this relates back to the reproductive health of humans and other animals In the first section the biology of human reproduction is discussed including such topics as the treatment and causes of infertility growth and maturation parental behaviour and neonate biology The effects of procreational biology on the foundation of human social structure are also examined The second part deals with reproduction as it relates to health and social issues such as stress fertility control AIDS teratogens and errors of sexual differentiation It is

an invaluable resource for all those wishing to update their knowledge of human reproductive biology

**Dynamics of Human Reproduction** James W. Wood, 2017-09-29 Awarded the W W Howells Award for the Outstanding Book in Biological Anthropology this volume presents a comprehensive integrated and up to date overview of the major physiological and behavioral factors affecting human reproduction In attempting to identify the most important causes of variation in fertility within and among human populations Wood summarizes data from a wide range of societies Trained as an anthropologist as well as a demographer he devotes special attention to so called natural fertility populations in which modern contraceptives and induced abortion are not used to limit reproductive output Such an emphasis enables him to study the interaction of biology and behavior with particular clarity The volume weaves together the physiological demographic and biometric approaches to human fertility in a way that will encourage future interdisciplinary research Instead of offering a general overview the focus is to answer one question Why does fertility and the number of live births vary from couple to couple within any particular population and from population to population across the human species as a whole Topics covered include ovarian function conception and pregnancy intrauterine mortality reproductive maturation and senescence coital frequency and the waiting time to conception marriage patterns and the initiation of reproduction the fertility reducing effects of breastfeeding the impact of maternal nutrition on reproduction and reproductive seasonality This unique combination of comprehensive subject matter and an integrated analytical approach makes the book ideally suited both as a graduate level textbook and as a reference work

*Human Reproduction*, 1974

**The Biology of Human Reproduction** John Juan Head, 1979-01-01 *The Biology and Medical Dynamics of Human Reproduction* Laurence A. Cole, 2014 This book covers human female biology how the menstrual cycle is controlled how steroidogenesis is controlled and how the follicle and the egg are formed This book covers male biology and how steroid hormones are made and how sperm are synthesised and matured Then this book covers sex biology such as how the brain deals with libido and sexual images and how the brain controls erection and ejaculation This book deals with how sperm are matured upon intercourse how fertilisation takes place and how the fertilised embryo is matured and implants in the uterus The subjects of sexuality and homosexuality chromosome disorders and hydatidiform moles are carefully discussed and considered Sexual maturation of the foetus during pregnancy is carefully considered This book carefully describes puberty adrenarche and menarche The subject of menopause is carefully considered The subject of major bacterial and viral and sexual diseases is carefully considered as is the subject of reproductive cancers In writing this book care has been taken to update everything and check out the information available on medline and on the internet This is a textbook for undergraduates medical students and graduates describing all the details of human reproduction It is also the only up to date book on the market Having examined a total 70 books on human reproduction obstetrics and gynaecology they all with no exceptions include mostly out of date science This is corrected in this book This book is also a monograph for reproductive biology scientists covering all the most recent findings in this field

It can also be sold as a general obstetrics and gynaecology information source for use by physicians the general public and in libraries This is a unique one of a kind reference on human reproduction     *Human Reproductive Biology* Sylvia S. Mader,2005 This text presents human reproduction from the biological point of view It is most appropriate for use by non science students who would like a biological understanding of human reproduction The three parts of the book may be studied in whatever sequences the instructor desires Part I contains topics on human inheritance and biotechnology Part II has in depth coverage of fertilization and the major biological events of embryonic and fetal development In Part III the evolution of sexual reproduction is presumed to have increased biological fitness
