contributions reporting on fuzzy logic and decision theory together with applications and case studies in economics and management science Dedicated to Professor Jaume Gil Aluja in recognition of his pioneering work the book reports on theories methods and new challenges thus offering not only a timely reference guide but also a source of new ideas and inspirations for graduate students and researchers alike Principles of Microeconomics N. Gregory Mankiw,1998

Principles of Macroeconomics, 9th Edition N. Gregory Mankiw,Ronald D. Kneebone,Kenneth J McKenzie,2023-02-01 Principles of Macroeconomics Ninth Canadian Edition breaks down concepts and emphasizes important themes for students It is the most widely used economics textbook on the market perfectly complementing instructor lessons Students should expect to gain a solid understanding of economic theory through real world applications While it prepares students for advanced economics studies it also speaks to people in other fields Mankiw stresses big picture ideas ensuring learners are grounded in essential economic concepts and principles *A Contractarian Approach to Law and Justice* William E. O'Brian Jr.,2020-05-20 This book presents a distinctive version of a contractarian approach to law and justice The work argues that law and justice are social norms that arise from a process of social evolution and are binding only if and to the extent that they are mutually beneficial It explicitly rejects accounts of law and justice that are based on morality on the basis that morality itself is only legitimately founded on mutual advantage But it also rejects most existing versions of contractarianism which are based on ideas of hypothetical agreements by rational contractors in favour of an approach that is based on actually existing social norms but advocates critically examining these norms and discarding those that are not truly mutually beneficial The first half of the book develops the approach while the second half explores some of its implications for law It argues for a left libertarian approach to property an approach largely based on the common law of tort contract and criminal law and a rejection of most statutory law which is based not on mutual advantage but rather on benefiting some at the expense of others However it ultimately recognises that there are those who want a more extensive state than this approach allows and advocates a strong form of federalism to allow this provided robust exit rights are provided The book combines political philosophy economics and law into an approach that is broadly libertarian but distinctive in many respects It will be of interest to scholars in all three of those disciplines *From Economics to Political Economy* Tim B. Thornton,2016-07-22 The discipline of economics has been increasingly criticized for its inability to illuminate the workings of the real world and to provide reliable policy guidance for the major economic and social challenges of our time A central problem in contemporary economics and a problem from which many of its other failings flow is its lack of plurality By a lack of plurality it is meant that contemporary economics lacks diversity in its methods theories epistemology and methodology It is also meant that economics has become far less interdisciplinary From Economics to Political Economy offers an explanation as to why economics has become so determinedly non pluralistic and also gives considerable attention to exploring and evaluating promising strategies for reform These strategies include developing a pluralist economics under the label of political

economy within other social science departments such as departments of politics Along the way the reader will learn about the worldwide student movement seeking greater pluralism in economics encounter some dramatic case studies in intellectual suppression gain a fuller sense of the nature of contemporary economics and explore the relationship between economics and other social sciences This book is of interest to any social scientist particularly those with interests in economics and politics **Telecommunications Piracy in Latin America** Eduardo Visconti,2024-08-30

Telecommunication piracy in Latin America is a complex issue with significant economic legal and social dimensions This book provides a comprehensive analysis of the problem highlighting the unique challenges faced by developing countries in the telecommunications sector Our research offers a new perspective on the economic impacts legal frameworks and potential solutions to this pervasive issue Part 1 The Economics of Telecommunication Piracy in Latin America The first section explores the economic drivers of telecommunication piracy High service prices low incomes and the perception of telecommunications as a luxury item contribute to the prevalence of piracy Part 2 How Criminal Law Can Act as a Catalyst for Economic Changes The second section addresses the legal aspects of telecommunication piracy In developing countries many people view piracy as a harmless crime affecting only multinational companies We explore the role of legal actions in raising the costs for pirates and influencing consumer behavior Part 3 Conclusion and Possible Solutions The final section synthesizes the insights from the economic and legal analyses presenting solutions to telecommunication piracy in Latin America We propose strategies for multinational corporations governments and local entities to collaborate in creating a more equitable and sustainable telecommunications market **Principles of Economics** N. New Subjects and New Governance in India Ranabir Samaddar, Suhit K. Sen, 2014-03-14 This volume looks at the ways in which governance in the exercise of its strategies also acts as a process of production of subjects It argues that governance is not a one sided affair starting and ending with those who rule and govern producing fiat decrees and diktats but a productive process one that produces subjects of governance who in turn respond to the process and make the field of governance a contentious one Against the backdrop of the first transition of democracy in India from its origin in a colonial polity to the first phase of its independent life after the promulgation of the Indian Constitution in 1950 this volume explores the second transition towards developmental democracy examining the interrelations between globalisation development and structures of governance The volume suggests that while there is need to reflect on the governance of transition it is important to question how democracy negotiates this transition

Promotion of Green Electricity in Germany and Turkey Onur Cagdas Artantas, 2023-10-31 The global energy economy is undergoing a profound transformation yielding several pivotal objectives Foremost among these is mitigating greenhouse gas emissions and toxic pollutants Another essential goal involves promoting more sustainable economies thereby curbing material consumption and reducing our reliance on resource extraction Further priorities include fostering energy security and economic resilience by reducing dependence on external energy sources All these aims overlap in one common policy accelerating the renewable energy capacity deployment Complementing this paradigm shift is the complete electrification of economic activities and households resulting in the need to incentivize green electricity generation In this context this book undertakes a comprehensive exploration of the regulatory framework underpinning the advancement of green electricity After reviewing the political and economic dimensions it offers an exhaustive analysis of ongoing developments in four legal domains The WTO EU Germany and Turkey Furthermore the book presents a legal analysis of the intricate interplay between the WTO and EU law coupled with the German and Turkish models It focuses on the most topical and relevant issues including the effect of

the ongoing energy crisis on state aid for green electricity in the EU WTO case law on local content requirement components of the promotion schemes the intricate legal economic and political challenges that accompany Germany's Energiewende and its phasing out of coal and nuclear energy and Turkey's regulatory endeavors to bolster its energy self sufficiency strategy Following a thorough examination encompassing theoretical regulatory and comparative aspects the book moves beyond the applicable legal framework to make concrete proposals on the future design of green electricity promotion in Germany and Turkey so as to facilitate a rapid but socially equitable energy transition by incentivizing economic efficiency

LOGICAL MINING OF ECONOMIC MEASUREMENT Dong Qiu, Dongju Li, 2019-09-04 As one of the critiques of contemporary economic statistics this corpus mainly queries the Report by the Committee on the Measurement of Economic Performance and Social Progress headed by J E Stiglitz The Report can be divided into three parts classical GDP issues quality of life and sustainable development and environment This corpus analyzes the necessity especially the feasibility of systematic revolution in economic measurement and points out the logical break between measurement issues and solutions This is a common economic measurement problem facing mankind at present so we cannot emphasize the quantitative analysis of empirical evidence while are extremely contemptuous of the basis of economic statistics Otherwise the data obtained from the deeper model will lose its real and clear economic significance which is a common fault of contemporary economics and economic statistics has great potential This corpus is suitable for those who are engaged in or interested in empirical analysis of economic statistics It can be read by postgraduates and undergraduates majoring in economics and management It can also be used as a reference for teachers engaged in economics teaching
