

CDI P/N: 474-9550 Universal Boat Side Wiring Harness

This harness replaces the boat side harness used on engines with the internal engine harness mounted through the lower cowling.

Warning! This product is designed for installation by a professional marine mechanic. CDI cannot be held liable for injury or damage resulting from improper installation, abuse, neglect or misuse of this product.

Installation

1. Disconnect the battery cables from the battery, negative cable first.
2. Disconnect the old harness from the engine.
3. Disconnect the keyswitch and gauges in the boat.
4. Remove the old boat side harness (TECH TIP: Tie a rope to the old harnesses wires near the end of the wires and pull it with the old harness. This will make it easier to pull the new harness back through the same route.)
5. Install the new boat side harness, routing the wires the same way as the old harness.
6. Terminate the new wires for the gauges as needed using the terminals provided and connect them to the gauges.
7. Connect the new wires to the ignition switch either as a solder connection or use the terminals provided.
8. Connect the new harness to the engine.
9. Connect the battery cables of the new harness to the battery.
