

87 Onward Sierra column switch with Sierra or Lucas Wiper Motor

Slow Speed

With the column switch set to slow speed and the ignition on, there is a fused ignition live supply to contact 54 on the switch. This is connected internally through the switch to feed current out through 53 on the switch which is wired to 53(5) on the motor and current thus flows through the slow speed circuit, driving the motor, and out to earth via motor contact 31(1).
