Three Studies in Locality and Case Alexander Grosu,2003-09-02 First Published in 2004 This work consists of three studies in the syntax of natural languages which pursue related theoretical goals assume common phrase structural and locality sub theories and share some of the languages from which the supporting data are drawn A theme that is central to both the first and third studies and tangentially touched upon in the second study is that of the syntax of the null element pro in various contexts and with various roles but first and foremost as Head of Free Relative Constructions and as Null Operator Another theme of central importance primarily in the first two studies is that of the syntax of Case

On the Bullet Train with Emily Brontë Judith Pascoe,2019-01-23 While teaching in Japan Judith Pascoe was fascinated to discover the popularity that Emily Brontë's novel Wuthering Heights has enjoyed there Nearly 100 years after its first formal introduction to the country the novel continues to engage the imaginations of Japanese novelists filmmakers manga artists and others resulting in numerous translations adaptations and dramatizations On the Bullet Train with Emily Brontë is Pascoe's lively account of her quest to discover the reasons for the continuous Japanese embrace of Wuthering Heights including quite varied and surprising adaptations of the novel At the same time the book chronicles Pascoe's experience as an adult student of Japanese She contemplates the multiple Japanese translations of Brontë as contrasted to the single or non-existent English translations of major Japanese writers Carrying out a close reading of a distant country's Wuthering Heights Pascoe begins to see American literary culture as a small island on which readers are isolated from foreign literature In this and in her previous book The Sarah Siddons Audio Files Pascoe's engaging narrative innovates a new scholarly form involving immersive research practice to attempt a cross cultural version of reader response criticism On the Bullet Train with Emily Brontë will appeal to scholars in the fields of 19th century British literature adaptation studies and Japanese literary history

**Against the Trend** Anne-Louise Critchlow,2016-07-20 William Kelly 1821-1906 was much more than a Brethren theologian who was a leader of the Moderate Exclusive Brethren movement and also much more than an indiscriminate follower of John Nelson Darby 1800-1882 He was highly regarded not only within the Brethren but also by Christian leaders of other denominations In this book Dr Critchlow examines Kelly's lively and scholarly appraisal of the German School of Higher Criticism and his commentary on a range of works of contemporary Anglican and non-conformist theologians She argues that Kelly's exegesis was meticulous and scholarly and demonstrated his understanding of the whole canon of Scripture Despite his ecclesiology his theology was nuanced and cannot easily be stereotyped As an expositor of the controversial topics the Atonement and the After Life he can be described as a Biblical literalist but in his understanding of Biblical language and literary genre and philosophy he can be seen as a conservative

intellectual While belonging to the evangelical school of thought his theology shows itself to be much more complex than many of his evangelical contemporaries and gives him links with later Christian traditions Through his deep spirituality Kelly can inspire the reader's own spiritual aspirations

**English Mechanic and World of Science**, 1889      **A Study of the Moral and Religious Elements in American Secondary Education Up to 1800** Adrian Augustus Holtz, 1917      *The Routledge Companion to Translation Studies* Jeremy Munday, 2009-01-13 Bringing together an international range of leading expert contributors to provide a clear and concise introductory overview to contemporary translation studies      *Cognitive Aspects of Computational Language Acquisition* Aline Villavicencio, Thierry Poibeau, Anna Korhonen, Afra Alishahi, 2013-01-11

Questions related to language acquisition have been of interest for many centuries as children seem to acquire a sophisticated capacity for processing language with apparent ease in the face of ambiguity noise and uncertainty However with recent advances in technology and cognitive related research it is now possible to conduct large scale computational investigations of these issues The book discusses some of the latest theoretical and practical developments in the areas involved including computational models for language tasks tools and resources that help to approximate the linguistic environment available to children during acquisition and discussions of challenging aspects of language that children have to master This is a much needed collection that provides a cross section of recent multidisciplinary research on the computational modeling of language acquisition It is targeted at anyone interested in the relevance of computational techniques for understanding language acquisition Readers of this book will be introduced to some of the latest approaches to these tasks including Models of acquisition of various types of linguistic information from words to syntax and semantics and their relevance to research on human language acquisition Analysis of linguistic and contextual factors that influence acquisition Resources and tools for investigating these tasks Each chapter is presented in a self contained manner providing a detailed description of the relevant aspects related to research on language acquisition and includes illustrations and tables to complement these in depth discussions Though there are no formal prerequisites some familiarity with the basic concepts of human and computational language acquisition is beneficial

about the transformation from conflict to peace through their everyday practices Conducted collaboratively by a research community based within the region this volume will be highly relevant to scholars and researchers studying the Balkans regional security security communities and policymakers      **Tragic Realism and Modern Society** John Orr,1989-02-25 A critical study which discusses passion and community as the central structures of feeling in tragic realism tracing their origins in Stendhal Tolstoy and Dostoevsky and explaining their contemporary eclipse in Western society      Cities as Spatial and Social Networks Xinyue Ye,Xingjian Liu,2018-07-24 This book reports on the latest cutting edge scholarship on integrating social network and spatial analyses in the built environment It sheds light on conceptualization and Implementation of such integration integration for intra city level analysis as well as integration for inter city level analysis It explores the use of new data sources concerning human and urban dynamics and provides a discussion of how social network and spatial analyses could be synthesized for a more nuanced understanding of the built environment As such this book will be a valuable resource for scholars focusing on city related networks in a number of urban disciplines including but not limited to urban geography urban informatics urban planning urban sociology and urban studies      *Linguistic Attractors* David L. Cooper,1999-06-15 The interdisciplinary linguistic attractor model portrays language processing as linked sequences of fractal sets and examines the changing dynamics of such sets for individuals as well as the speech community they comprise Its motivation stems from human anatomic constraints and several artificial neural network approaches It uses general computation theory to 1 demonstrate the capacity of Cantor like fractal sets to perform as Turing Machines 2 better distinguish between models that simply match outputs emulation and models that match both outputs and internal dynamics simulation and 3 relate language processing to essential computation steps executed in parallel Measure and information theory highlight the key variables driving linguistic dynamics while catastrophe and game theory help predict the possible topologies of language change It introduces techniques to isolate and measure attractors and to interpret their stability and relative content within a system Important results include the capability to distinguish the sequence of related sound changes and to make point to point comparisons of different texts using common metrics Other techniques allow quantifiable ambiguity landscapes illustrating the forces that propel different languages in different directions      *Academy, with which are Incorporated Literature and the English Review* ,1876
