An Uncertain Trumpet Kenneth Finlayson, 2001-07-30 Faced with severe budgetary constraints a radically reduced force structure and a crippling intellectual dogmatism the American Infantry struggled throughout the interwar years to modernize its doctrine Finlayson examines these difficulties beginning with an overview of the experiences of the primary combatants of the First World War comparing their battlefield doctrines with that of the American Expeditionary Force The brief American appearance on the battlefield did much to shape the convictions of those men assigned the task of developing doctrine after the war The findings of the post World War I Superior Board provide valuable insight into how institutional conservatism and the dogmatic approach to new ideas that existed among senior Army leaders stymied possible doctrinal advances The Army would suffer greatly in the post war demobilization and the subsequent ravages of the Great Depression With little money and few soldiers spread around far flung posts little advancement in terms of doctrinal development was possible As the likelihood of war became more imminent in the 1930s a concerted effort to modernize was made however the magnitude of the task made success virtually impossible a situation that was evident in the Infantry's poor performance in the early battles of the war The U S entry into World War II would unfortunately find the infantry branch only partially prepared for the battle field of 1942

Issues covered include relations with family, substance use, housing, educational and job training opportunities, post-traumatic stress disorder, and other health issues, and experiences of women, sexual minorities, and ethnic/racial minorities in the armed services. This set also examines major issues related to military service for people close to the men and women who serve our country, such as spouses or partners, children, and parents grappling with such issues as single parenthood during deployment and bereavement at the loss of a loved one. Finally, this set is a valuable resource for people seeking a greater understanding of the issues that confront some military service members and veterans, from chronic health problems to economic vulnerability to suicide to incarceration. From an elite Navy rescue swimmer comes this insider perspective on what it takes to survive some of the most dangerous situations imaginable and how the lessons learned can help overcome other momentous challenges. Brian Dickinson, famously known for having climbed down Mt. Everest while completely snow-blind, is often asked how he managed the incredible feat. He has always attributed it to his faith and to his U.S. Navy Search and Rescue Training, which taught him how to remain calm in moments of chaos. For the first time, Brian takes an in-depth look at the training that saved his life and the missions, both his and others, where these skills were put to the test to save other people. Over two decades after being honorably discharged from the Navy, Brian is compelled to share his unique military training and experiences. He believes that sharing the training that he received to overcome adversity in the most extreme scenarios can help others to overcome their own personal Everest. Even beyond mountaineering, the military training has rewired Brian's ability to navigate difficult business, financial, health, and relationship challenges. With the chaos of the world continuing to expand, these stories from U.S. Navy rescue swimmers provide a fresh perspective on what it takes to survive some of the most dangerous situations and how that shapes the rest of a person's life.
