

ACOUSTIC MEASUREMENT PRODUCT SELECTION GUIDE

Endevco® microphones, preamplifiers and accessories

Measurement microphones can be used to study sounds within an automobile interior, from sources such as the engine and doors.

Endevco® prepolarized condenser measurement microphones, available in 1/8", 1/4", and 1/2" diameters, are offered in free-field, pressure, low-cost array and random incidence types and can be used to meet IEC and ANSI standards. Array microphones offer a lower overall per channel measurement cost and are directly compatible with Isotron® [IEPE-type] signal conditioning. They can be used as drop-in replacements within existing accelerometer test system set-ups for as-needed precision noise measurements. Models may be purchased as stand-alone units, or in a microphone and low-noise preamplifier combination with iTEDS on-board memory storage capabilities, facilitating their use within larger channel count applications. All microphones are constructed with a stainless steel protective grid case and housing, as well as a special stainless steel alloy diaphragm, for high reliability in a variety of application environments.

Available for use with Endevco precision measurement microphones are a full range of low-noise Isotron preamplifiers, handheld calibrators, and accessories. In addition, all acoustic sensors and instrumentation are covered by a five-year comprehensive product warranty. For detailed technical specifications, drawings or additional information on acoustic sensors, or other Endevco products available from Meggitt Sensing Systems, visit www.meggittsensing.com.
