Energy and Environmental Project Finance Law and Taxation Andrea Kramer, Peter Fusaro, 2010-12-09 Energy and Environmental Project Finance Law and Taxation New Investment Techniques provides practitioners with a useful and comprehensive discussion of energy and environmental project finance as it is developing and where it is going in light of new legal and tax rules This is the first time that internationally recognized lawyers and economists share their knowledge expertise and insights in this important and growing industry Energy and Environmental Project Finance Law and Taxation examines cutting edge techniques and analyses the recent tax and legal developments coming out of Washington all of which are revolutionizing the investment in and financing of energy and environmental projects Written for practitioners and laymen alike Energy and Environmental Project Finance Law and Taxation arms the reader with crucial knowledge about structuring and financing conventional renewable green financing and alternative energy projects It addresses carbon financing green power and traditional and new technologies including nuclear power wind photovoltaic solar geothermal biomass and the new generation of nuclear power This book also addresses the risks involved in structuring and financing these new technologies ways to hedge these risks and how to monetize the tax credits available for renewable energy projects

Energy Law: An Introduction Raphael J. Heffron, 2021-06-23 The aim of this short text is simply to introduce a reader to this topic It is intended for a global audience and rather than being restricted to potential energy law students of a particular country It is also written for students of other disciplines such as geographers social scientists and engineers It should also be engaging to those in a variety of professional practices who want an accessible background to and overview of the subject The first edition of Energy Law An Introduction was a great success and this extended second edition is expected to be just as successful It is used widely as a core text in energy law courses across the world and this second issue adds further discussion on important topics such as energy law principles and drivers Further it highlights issues of energy justice a growing and an emergent topic which is also at the core of the energy law principles and the key drivers of why new energy law is formulated The text aims to outline the principles and central logic behind energy law Therefore readers from across the world should be able to use it as a guide to thinking about energy law in their own countries A variety of examples from many different countries are included in the text and while examples and comparisons are mainly from the EU and US they represent good examples of more advanced and innovative energy law For those readers who seek further or more in depth knowledge this text will only serve as an introduction However a key focus of the book is to direct the reader where they to look for further information and within the book there are suggested extra readings the key recommended journals to read and other sources of information based on institutions who publish further material in this area Overall this second edition of Energy Law An Introduction aims to inspire students and others to contribute to try and improve energy law across the world and enable us all to contribute in our own small way to delivering a just and sustainable energy world for future generations
