Translanguaging with Multilingual Students Ofelia García, Tatyana Kleyn, 2016-06-10 Looking closely at what happens when translanguaging is actively taken up to teach emergent bilingual students across different contexts this book focuses on how it is already happening in classrooms as well as how it can be implemented as a pedagogical orientation It extends theoretical understandings of the concept and highlights its promises and challenges Using a Transformative Action Research design six empirically grounded ethnographic case studies describe how translanguaging is used in lesson designs and in the spontaneous moves made by teachers and students during specific teaching moments The cases shed light on two questions How when and why is translanguaging taken up or resisted by students and teachers What does its use mean for them Although grounded in a U S context and specifically in classrooms in New York State Translanguaging with Multilingual Students links findings and theories to different global contexts to offer important lessons for educators worldwide

Knowledge, Curriculum and Equity Brian Barrett, Ursula Hoadley, John Morgan, 2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist post structuralist and postmodernist approaches dominant in the sociology of education The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into

conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all
