Papermaking Robert R. A. Higham,1968 Handbook Pulp and Paper Technology ,1970 Handbook on Pulp and Paper
Processing NPCS Board of Consultants & Engineers,2008-10-01 The pulp and paper industry comprises companies that use
wood as raw material and produce pulp paper board and other cellulose based products The pulp and paper sector presents
one of the energy intensive and highly polluting sectors within the Indian economy and is therefore of particular interest in
the context of both local and global environmental discussions Increases in productivity through the adoption of more
efficient and cleaner technologies in the manufacturing sector will be most effective in merging economic environmental and
social development objectives Papers are mostly used product starting from writing to packaging It plays an important role in
commercial field as well as in academic field also Without paper nothing is expressible and reliable so paper is part and
parcel of our life Adequate amount of raw materials for processing paper and pulp is available Bamboo is the main raw
material for Indian paper industry New bamboo areas even at high cost are being trapped Some of the examples of high yield
pulping process are mechanical process semi chemical process alkaline chemical process sulfite process etc Physical
strength properties of paper depend on the quality of raw material its pulping bleaching and subsequent paper making
processes Technology has made it easy to process these raw materials in an economic and lucrative way to meet the global
demand Raw materials like straw bagasse wood bamboo is almost available in most of the places So it is great opportunity for
the entrepreneurs to start up such kind of industry Paper Industry has tremendously increased in India in the last 20 to 30
yrs The Paper industry is a priority sector for foreign collaboration and foreign equity participation up to 100% receives
automatic approval by Reserve Bank of India Several fiscal incentives have also been provided to the paper industry
particularly to those mills which are based on non conventional raw material Some of the fundamentals of the book are

bleaching of bamboo cold high yield semi chemical pulping of mixture of bamboo and mixed hardwoods sulphate semi chemical process kraft green liquor semi chemical process neutral sulphite semi chemical process thermo mechanical pulps for newsprint zeta potential concept in paper sizing sodium carbonate in alkali extraction during bleaching bamboo maintenance engineering in pulp and paper industry design and application of refiners in stock preparation paper machine effluent etc This book explains about the various raw material their processing and utilizations and also the possible waste treatment of such paper and pulp making industry To draw attention for manufacturing quality product with all possible latest technologies is the main purpose of this book The book is very resourceful for new entrepreneurs technocrats existing units and research scholars
