E. Hall, 2025-04-01 Change can be interesting challenging easy difficult and sometimes fun The Concerns Based Adoption Model CBAM Constructs Evidence Applications and Implications for Facilitating Change edited by Gene E Hall a key originator of CBAM uses a research tested model to introduce students in education to ways of thinking strategies and steps that leaders can take to facilitate and advance change processes in their own schools The primary focus of this book and method is on understanding the thoughts perceptions feelings and concerns of the people who are engaged with change and finding systematic ways to address them This edited volume provides clear instruction from researchers who know CBAM best experiences and case studies from a wide variety of educational settings and strong pedagogy so readers can learn

CBAM and apply this model to their educational systems **Preparing STEM Teachers** Joanne E. Goodell, Selma Koç, 2020-09-01 STEM project based instruction is a pedagogical approach that is gaining popularity across the USA However there are very few teacher education programs that focus specifically on preparing graduates to teach in project based environments This book is focused on the UTeach program a STEM teacher education model that is being implemented across the USA in 46 universities Originally focused only on mathematics and science many UTeach programs are now offering engineering and computer science licensure programs as well This book provides a forum to disseminate how different institutions have implemented the UTeach model in their local context Topics discussed will include

sustainability features of the model and how program assessment innovative instructional programming classroom research and effectiveness research have contributed to its success The objectives of the book are To help educators gain insight into a teacher education organizational model focused on STEM and how and why it was developed To present the theoretical underpinnings of a STEM education model i e deep learning conceptual understanding To present innovative instructional programming in teacher education i e projectbased instruction functions and modeling research methods To present research and practice in classroom and field implementation and future research recommendations To disseminate program assessments and improvement efforts

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature

are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions

Education in a Federal UK John Furlong, Ingrid Lunt, 2019-10-23 Britain s two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK It seems that for the first time the public the media and the political elite have woken up to the fact that in different parts of the UK there are different histories different aspirations and different imagined futures in relation to a whole range of vitally important political issues But what the public debate often fails to recognise is that in many areas of public life perhaps especially education the UK is already a federal state and in key respects has been so for many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education
