Programming have been made in very different branches of mathematics and its applications Since these publications are
scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all
these sources is a helpful tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut
für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked
on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has
gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily
accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement
of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its
responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense
incomplete We have however tried to be as complete as possible The bibliography contains 4704 different publications by
