the world's richest men was tasked with reporting on a president who had campaigned against the press as the lowest form of humanity. Pressures on Baron and his colleagues were immense and unrelenting, having to meet the demands of their new owner while contending with a president who waged a war of unprecedented vitriol and vengeance against the media. In the face of Trump's unceasing attacks, Baron steadfastly managed the Post's newsroom. Their groundbreaking and award-winning coverage included stories about Trump's purported charitable giving misconduct by the Secret Service and Roy Moore's troubling sexual history. At the same time, Baron managed a restive staff during a period of rapidly changing societal dynamics around gender and race. In *Collision of Power*, Baron recounts this with the tenacity of a reporter and the sure hand of an experienced editor. The result is elegant and revelatory, an urgent exploration of the nature of power in the 21st century.

**Finance for Normal People** Meir Statman, 2017 *Finance for Normal People* teaches behavioral finance to people like you and me, normal people, neither rational nor irrational. We are consumers, savers, investors, and managers, corporate managers, money managers, financial advisers, and all other financial professionals. The book guides us to know our wants, including hope for riches, protection from poverty, caring for family, sincere social responsibility, and high social status. It teaches financial facts and human behavior, including making cognitive and emotional shortcuts and avoiding cognitive and emotional errors such as overconfidence, hindsight, exaggerated fear, and unrealistic hope. And it guides us to banish ignorance, gain knowledge, and increase the ratio of smart to foolish behavior on our way to what we want. These lessons of behavioral finance draw on what we know about us, normal people, including our wants, cognition, and emotions. And they draw on the roles of these factors in saving and spending, portfolio construction, returns we can expect from our investments, and whether we can hope to beat the market. Meir Statman, a founder of behavioral finance, draws on his extensive research and the research of many others to build a unified structure of behavioral finance. Its foundation blocks include normal behavior, behavioral portfolio theory, behavioral life cycle theory, behavioral asset pricing theory, and behavioral market efficiency.
