Jorgensen, Kevin Larkin, 2017-08-09 This book brings together a collection of internationally renowned authors in the STEM field to share innovations in the teaching of STEM. It focuses on the junior secondary years of education, students aged 11-15, since this is the age range in which students choose whether or not to formally opt out of STEM education. It is here that the book makes a significant contribution to the field by integrating the STEM area and focusing on the junior years of schooling. While developing this book, the editors drew on two main premises. Firstly, STEM is seen as the integrated study of science, technology, engineering, and mathematics in a coherent learning paradigm that is based on real-world applications. Secondly, it is important to integrate digital technologies into STEM education beyond the superficial use of ICTs seen in many schools. The book also addresses the challenges within STEM education, many of which are long-standing. To this end, it includes chapters on marginalised and diverse communities, ensuring that a broad range of perspectives on STEM education is included.

Gender and STEM Namrata Gupta, 2025-02-27 This book studies the prevalence of gender inequalities in the domains of science, technology, engineering, and mathematics in STEM in India. It explores the paradox of an increasing number of women pursuing higher education in STEM fields while a relatively low percentage enter the job market. The book analyzes the factors that contribute to the loss of potential contributions from women in science. It underscores the need to understand the construction of masculinity and femininity, as well as male privilege and female disadvantage, and how these concepts are associated with STEM. Lucid, topical, and rich in empirical data, this book will be indispensable for scholars and researchers of women's studies, gender studies, sociology of science, science and technology studies, political studies, and public policy. It will also be useful to policymakers, organizations, and professionals working in the STEM fields.

Youth Identities, Education and Employment Kate Hoskins, 2017-07-18 This book investigates how policy, family background, social class, gender, and ethnicity influence young people's post-16 and post-18 employment and education access. It draws on existing literature alongside new data gathered from a case study in a UK state secondary school to examine how policy changes to the financial arrangements for further and higher education and the changing youth employment landscape have had an impact on young people's choices and pathways. Hoskins explores a number of topics, including the role of identity in young people's decision-making, the impact of changes to young people's financial arrangements such as cuts to the Education Maintenance Allowance and increased university fees, and the influence of support from parents and teachers. The book will be of interest to students and researchers of Education and Sociology.

Policy-Making in the GCC Neil Quilliam, Mark C.

Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states especially Kuwait, Qatar, Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity, surprisingly little attention has been paid to the actual mechanics of policy making in the region. This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf and the era of low oil prices. Both developments, along with dramatic demographic change, have compelled states and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy. The book shows how academic, social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority. With contributions from both academics and practitioners, this book will be highly relevant for researchers and policymakers alike.
