Circular

Business Models in the Mobile Phone Industry David Watson, Anja Charlotte Gylling, Naoko Tojo, Harald

Throne-Holst, Bjørn Bauer, Leonidas Milios, 2017-11-30 The circular economy offers opportunities to reduce resource use and waste whilst providing business opportunities. This is also true in the mobile phone industry that has been characterised by high rates of product obsolescence. The emergence of the smart phone has changed the landscape making repair, refurbishment and resale attractive to businesses and consumers. Moreover, emerging modular phone design should allow functional upgrades with low resource wastage. This report investigates the adoption of circular business models within Nordic markets. Producers, retailers, refurbishers, recyclers and resellers tell of their motivation, experiences and the challenges that they face. A special look is taken at consumer and waste law and the challenges and opportunities they represent. The report ends with 17 policy proposals that can accelerate the adoption of circularity in the sector. **Startup**

strategies it s the ultimate resource for aspiring Indian entrepreneurs **Future-proofing** Carla Simone,Ina Wagner,Claudia Müller,Anne Weibert,Volker Wulf,2022-02-03 Innovative research solutions increasingly require deep engagement with practitioners to manage the complex problems they are attempting to solve This often project based research is equipped with finite resources over a limited period without much thought into future proofing the practice These projects must face questions of what happens when a product comes to an end and whether there are any lasting positive effects once the IT systems are no longer being actively developed From a computing perspective the challenge is to design IT artifacts that contribute to improving the user s work and everyday life in a sustainable way thereby also contributing to social and ecological sustainability *Future Proofing Making Practice Based IT Design Sustainable* documents the experiences made by several leading research groups in Europe North America and South Africa It describes their efforts to achieve sustainable design results the difficulties that barred the way but also the strategies they adopted to achieve the goal of sustainability The analysis of these cases has inspired thinking about how to more systematically address and possibly overcome the impediments to sustainability This book develops a strong future oriented perspective that conceptualizes sustainability as a complex and highly variegated issue and formulates insights and recommendations with a view to help researchers to better design for sustainability Information and Communication Technologies for Women's Socioeconomic Empowerment Samia Melhem,Claudia Morrell,Nidhi Tandon,2009-10-02 This paper reviews how women in the developing world access and use information and communication technology ICT It examines the discourse and controversies surrounding the digital gender divide including links to poverty and illiteracy Major themes concerning women and ICTs are explored such as women in the ICT workforce how girls and women relate differently to ICT and opportunities and barriers for women in science and technology in general Current research relating to gender and ICT is often country specific and is more prevalent in developed countries than in developing countries This paper suggests where additional research is needed on barriers to women s entry and access to ICT The overall objective of this paper is to influence policy dialogue around women and ICT for development by raising awareness of the digital gender divide Economic opportunity for women in ICT will not be realized until policies address gender considerations and ensure that ICT investment contributes to more sustainable and equitable development *Industry 4.0 and Circular Economy* Antonis Mavropoulos,Anders Waage Nilsen,2020-11-17 How the marriage of Industry 4 0 and the Circular Economy can radically transform waste management and our world Do we really have to make a choice between a wasteless and nonproductive world or a wasteful and ultimately self destructive one Futurist and world renowned waste management scientist Antonis Mavropoulos and sustainable business developer and digital strategist Anders Nilsen respond with a ringing and optimistic No They explore the Earth changing potential of a happy and wasteless marriage between Industry 4 0 and a Circular Economy that could with properly reshaped waste management practices deliver transformative environmental health and societal benefits This book is about the

possibility of a brand new world and the challenges to achieve it The fourth industrial revolution has given us innovations including robotics artificial intelligence 3D printing and biotech By using these technologies to advance the Circular Economy where industry produces more durable materials and runs on its own byproducts the waste management industry will become a central element of a more sustainable world and can ensure its own but well beyond business as usual future Mavropoulos and Nilsen look at how this can be achieved a wasteless world will require more waste management and examine obstacles and opportunities such as demographics urbanization global warming and the environmental strain caused by the rise of the global middle class Explore the new prevention reduction and elimination methods transforming waste management Comprehend and capitalize on the business implications for the sector Understand the theory via practical examples and case studies Appreciate the social benefits of the new approach Waste management has always been vital for the protection of health and the environment Now it can become a crucial role model in showing how Industry 4.0 and the Circular Economy can converge to ensure flourishing sustainable and much brighter future Sociality Revisited? The Use of the Internet and Mobile Phones in Urban Cameroon Anja Frei, 2013-04-08 This book draws on the perspectives of non migrants and urban youth in Bamenda in the Northwest region of Cameroon as well as on the views of Cameroonian migrants in Switzerland to explore the meaning and role of New Media in the negotiation of sociality in transnational migration New Media facilitated connectedness serve as a privileged lens through which Cameroonians home and away scrutinise and mediate sociality In this rich ethnography Bettina Frei describes how the internet and mobile phones are adopted by migrants and their non migrant counterparts in order to maintain transnational relationships and how the specific medialities of these communication technologies in turn impact on transnational sociality Contrary to popular presumptions that New Media are experienced as mainly connecting and enabling this study reveals that in a transnational context in particular New Media serve to mediate tensions in transnational social ties The expectations of being connected go hand in hand with an awareness of social and geographical distance and separation *Repairing Infrastructures* Christopher R. Henke, Benjamin Sims, 2020-10-13 An investigation of the causes and consequences of the strange ambivalent and increasingly central role of infrastructure repair in modern life Infrastructures communication food transportation energy and information are all around us and their enduring function and influence depend on the constant work of repair In this book Christopher Henke and Benjamin Sims explore the causes and consequences of the strange ambivalent and increasingly central role of infrastructure repair in modern life Henke and Sims offer examples from local to global to investigate not only the role of repair in maintaining infrastructures themselves but also the social and political orders that are created and sustained through them Repair can encompass not only the kind of work we most commonly associate with the term but also any set of practices aimed at restoring a sense of normalcy or credibility to the places and institutions we inhabit in everyday life From cases as diverse as the repair of building systems on a university campus a conflict over retrofitting a bridge while protecting murals

painted on it and the global challenge posed by climate change Henke and Sims assemble a range of examples to illustrate key conceptual points about the role of repair They show that repair is an essential if often overlooked aspect of understanding the broader impact and politics of infrastructures Understanding repair helps us better understand infrastructures and the scope of their influence on our lives
