Strange Likeness Chris Jones, 2006-09-07 Strange Likeness examines how Old English was rediscovered by twentieth century poets and the uses to which they put that discovery in their own writing Poets discussed include Ezra Pound W H Auden Edwin Morgan and Seamus Heaney whose translation of Beowulf is for the first time fully contextualized within the rest of his work **Religious Beliefs,**

Evolutionary Psychiatry, and Mental Health in America Kevin J. Flannelly, 2017-04-08 This book provides a new perspective on the association between religious beliefs and mental health The book is divided into five parts the first of which traces the development of theories of organic evolution in the cultural and religious context before Charles Darwin Part II describes the major evolutionary theories that Darwin proposed in his three books on evolution and the religious sociological and scientific reactions to his theories Part III introduces the reader to the concept of evolutionary psychiatry It discusses how different regions of the brain evolved over time and explains that certain brain regions evolved to protect us from danger by assessing threats of harm in the environment including other humans Specifically this part describes how psychiatric symptoms that are commonly experienced by normal individuals during their everyday lives are the product of brain mechanisms that evolved to protect us from harm the prevalence rate of psychiatric symptoms in the U S general population how religious and other beliefs influence the brain mechanisms that underlie psychiatric symptoms and the brain regions that are involved in different psychiatric disorders Part IV presents the findings of U S studies demonstrating that positive beliefs about God and life after death and belief in meaning in life and divine forgiveness have salutary associations with mental health whereas negative beliefs about God and life after death belief in the Devil and human evil and doubts

about one's religious beliefs have pernicious associations with mental health. The last part of the book summarizes each section and recommends research on the brain mechanism underlying psychiatric symptoms and the relationships among these brain mechanisms, religious beliefs, and mental health in the context of ETAS Theory. This comprehensive analysis is a definitive reference work for the field of science education. *Children's Books in Print, 2007*, 2006 *Sexual Identity: The Harmony of Philosophy, Science, and Revelation* John D. Finley, PhD, Cara Buskmiller, MD, Paul W. Hruz, MD, PhD, Patrick W. Lappert, MD, Andrew Sodergren, PsyD, Lawrence J. Welch, PhD, 2022-07-01 Have man and woman become meaningless categories? Public promotion of transgender identities, same sex marriage, and surrogate parenthood indicate that we no longer view male and female as central to human flourishing. Perhaps man and woman amount to nothing more than one's own self-expression. Many intuitively resist such a view but feel unable to respond in light of woke rhetoric from media-driven voices carrying the apparent blessings of science. We need to recall who and what we are. *Sexual Identity: The Harmony of Philosophy, Science, and Revelation* takes up anew the questions: What is a man? What is a woman? Taking a holistic approach, the book is co-authored by experts from different fields: philosophy, obstetrics and gynecology, endocrinology, psychology, plastic surgery, and theology. For the sake of accessibility, the style is thoughtful but not academic. Each chapter includes review points along with suggestions for further reading. The authors include recognized practitioners in their fields who have spoken nationally and internationally to audiences concerned with today's crisis over the meaning of sexuality. *Sexual Identity* assembles these voices into a coherent whole. Written by experts for non-specialists, it offers a comprehensive vision of the human sexual identity: male and female. It offers much-needed wisdom to see through the deceptions that afflict our time. Contributors: Cara Buskmiller MD, John D. Finley PhD, Paul W. Hruz MD PhD, Patrick W. Lappert MD, Andrew Sodergren PsyD, Lawrence J. Welch
