Elephant Toothpaste

You will need

- A clean plastic soda bottle
- 1/2 cup 20-volume hydrogen peroxide liquid
- 1 Tablespoon of dry yeast
- 3 Tablespoons of warm water
- Liquid dish washing soap
- Food colouring
- Small cup
- Safety goggles

NOTE: Foam will overflow from the bottle; place the bottle on a tray.

1. Hydrogen peroxide can irritate skin and eyes, so put on those safety goggles and ask an adult to carefully pour the hydrogen peroxide into the bottle.

2. Add 8 drops of your favourite food colouring into the bottle.

3. Add about 1 tablespoon of liquid dish soap into the bottle and swish the bottle around a bit to mix it.

4. In a separate small cup, combine the warm water and the yeast together and mix for about 30 seconds.

5. Now the adventure starts! Pour the yeast water mixture into the bottle (a funnel helps here) and watch the foaminess begin!

Elephants Tooth Paste Lesson Plan:

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

The Art of Appraisal Barbara D. Culp, 2017-09-13 The Art of Appraisal saves time and boosts performance with effective tools and a streamlined process. With a few detailed comments, an appraisal can correct weak habits, boost midlevel professionals, and launch excellent teachers into greatness. The Art of Appraisal allows administrators to reap the greatest benefits by creating clarity and efficiency in the process. First, a binary feedback structure ruled by four performance tiers is described. Then, ten key areas of teacher responsibility are defined. Each task is further parsed into four subcategories. Evaluations become faster and easier, and the feedback becomes exponentially more profound. Rich with real world examples and comments about different performance ratings, The Art of Appraisal clarifies and distills the evaluation process. Supplemental chapters are packed with practical comments that can be pasted into evaluations. This structured step-by-step system was developed by Dr. Culp, an educational professional with over forty years of experience. An invaluable tool for administrators and the teachers they evaluate, The Art of Appraisal allows a school's most effective tool to be used in the most efficient manner.

Developing Independent Learning In Science: Practical Ideas And Activities For 7-12 Year Olds Lakin, Liz, 2013-08-01 This practical guide to promoting and developing independent learning is presented in a mixed format using both diagrammatic and textual stimulus. It offers tips and suggestions to achieve effective teaching and learning and raises standards by enabling the pupil to become independent and responsible for their own learning. Autonomous in their thinking and creative and critical in their understanding, Liz Lakin describes a progression away from dependency on the classroom teacher whose role changes readily from teacher to facilitator. Drawing on practice-based research, she introduces the skills and processes associated with independent learning through established strategies such as

Assessment for Learning the use of Active learning techniques problem solving activities and peer assessment Each chapter presents tried and tested ideas strategies and activities for the development of higher order skills such as application synthesis evaluation and reflection to use with pupils across the dependency spectrum Several relate to the higher levels of attainment and are therefore applicable at Key Stage 3 The effectiveness of teacher pupil feedback and the role of homework form a significant focus for the latter part of the book A truly thought provoking interactive book with a difference that takes teachers on a learning journey It encourages us to reflect on how we learn how our pupils learn and what the collective implications for effective teaching and helping pupils to construct their learning are Reading and actively engaging with this book is indeed a learning journey invaluable to practitioners The text contains many invaluable references and deals with topics such as the value of homework how people learn and how people respond to techniques addressee to hem in learning situations An essential reading for practicing teachers and particularly students in training and their tutors Dr Sue Dale Tunnicliffe Senior lecturer in Science Education Institute of Education University of London UK There has never been a time when independent learning is more important in school science In *Developing Independent Learning in Science* Liz Lakin challenges the reader to examine how they teach science and why pupils respond as they do The result is a book that should be of great value to those who teach science to 7 12 year olds and to science educators in general A particular strength is the way the author interweaves rigorous thinking about learning with activities for the reader to help them engage with the text In addition there is a mass of useful thinking in here and plenty of classroom suggestions The book is worth reading simply for the honesty of the How not to climb Helvellyn case study Michael J Reiss Professor of Science Education Institute of Education University of London UK In this book Liz Lakin involves the readers in the kind of independent learning that she is describing and advocating It should enable practising teachers to stand back from their work to consider why we want children to learn in a certain way as well as providing useful ideas about how to do it It is written in a personal and engaging style and is a unique addition to books on science teaching Wynne Harlen OBE PhD Visiting Professor of Education University of Bristol UK

Relearning to Teach David Fawcett, 2019-09-16 *Relearning to Teach* challenges the seemingly complex teaching profession and the various initiatives strategies and ideas that are regularly suggested It explores how teaching methods are used without a clear understanding of why which leads to ineffective teaching that is believed to work but ultimately doesn't Cutting through the clutter of conventional teacher guidance David Fawcett tackles myths head on sharing the latest research and explaining how this will look translated to a classroom environment The book breaks down the complexities of teaching into manageable chunks and offers practical advice on how to take charge of your own CPD to become a more reflective and successful practitioner Focusing on what's most relevant and helpful to build effective teaching practice and self improvement it raises key questions such as Is lesson planning just a box ticking exercise Why do students remember in lessons but forget in tests Is asking more questions beneficial Is feedback actually worth it *Relearning to Teach*
