Historical Continuity in the Emergence of Modern Hebrew Yael Reshef,2019-11-13 Historical Continuity in the Emergence of Modern Hebrew offers a new perspective on the emergence processes of Modern Hebrew and its relationship to earlier forms of Hebrew Based on a textual examination of select case studies of language use throughout the

modernization of Hebrew this book shows that due to the unconventional sociolinguistic circumstances in the budding speech community linguistic processes did not necessarily evolve in a linear manner blurring the distinction between true and apparent historical continuity The emergent language's standardization involved the restructuring of linguistic habits that had initially taken root among the first speakers often leading to a retreat from early contact induced or non classical phenomena Yael Reshef demonstrates that as a result superficial similarity to earlier forms of Hebrew did not necessarily stem from continuity and deviation from canonical Hebrew features does not necessarily stem from change

of forms uses in the Masoretic text and variation between the Masoretic text and other textual traditions Features A unique approach that examines the nature of the sources and the description of their language together Extensive bibliography for further research Tables of linguistic variables and parallels Usage-Based Studies in Modern Hebrew Ruth A. Berman, 2020-03-18 The goal of the volume is to shed fresh light on Modern Hebrew from perspectives aimed at readers interested in the domains of general linguistics typology and Semitic studies Starting with chapters that provide background information on the evolution and sociolinguistic setting of the language the bulk of the book is devoted to usage based studies of the morphology lexicon and syntax of current Hebrew Based primarily on original analyses of authentic spoken and online materials these studies reflect varied theoretical frames of reference that are largely model neutral in approach To this end the book presents a functionally motivated dynamic approach to actual usage rather than providing strictly structuralist or formal characterizations of particular linguistic systems Such a perspective is particularly important in the case of a language undergoing accelerated processes of change in which the gap between prescriptive dictates of the Hebrew Language Establishment and the actual usage of educated literate but non expert speaker writers of current Hebrew is constantly on the rise Language Contact, Continuity and Change in the Genesis of Modern Hebrew Edit Doron, Malka Rappaport Hovav, Yael Reshef, Moshe Taube, 2019-09-18 The emergence of Modern Hebrew as a spoken language constitutes a unique event in modern history a language which for generations only existed in the written mode underwent a process popularly called revival acquiring native speakers and becoming a language spoken for everyday use Despite the attention it has drawn this particular case of language shift which differs from the better documented cases of creoles and mixed languages has not been discussed within the framework of the literature on contact induced change The linguistic properties of the process have not been systematically studied and the status of the emergent language as a discontinuous stage of its historical sources has not been evaluated in the context of other known cases of language shift The present collection presents detailed case studies of the syntactic evolution of Modern Hebrew alongside general theoretical discussion with the aim of bringing the case of Hebrew to the attention of language contact scholars while bringing the insights of the literature on language contact to help shed light on the case of Hebrew *Linguistic Studies on Biblical Hebrew*, 2021-03-08 This volume presents the research insights of twelve new studies by fourteen linguists examining a range of Biblical Hebrew grammatical phenomena The contributions proceed from the second international workshop of the Biblical Hebrew Linguistics and Philology network [www BHLaP wordpress com](http://www.BHLaP.wordpress.com) initiated in 2017 to bring together theoretical linguists and Hebraists in order to reinvigorate the study of Biblical Hebrew grammar Recent linguistic theory is applied to the study of the ancient language and results in innovative insight into pausal forms prosodic dependency ordinal numeral syntax ellipsis the infinitive system light verbs secondary predicates verbal semantics of the Hiphil binyan and hybrid constructions James Barr Assessed, 2021-08-16 James Barr is a widely recognized name in biblical studies even if he is still best known

for his *The Semantics of Biblical Language* Barr's *Semantics* although first published in 1961 still generates animated discussion of its claims. However, over his lengthy career Barr published significant scholarship on a wide variety of topics within Old Testament studies and beyond. This volume provides an assessment of Barr's contribution to biblical studies sixty years after the publication of his first and still memorable volume on biblical semantics. As a result, this volume includes essays on major topics such as the Hebrew language, lexical semantics, lexicography, the Septuagint, and biblical theology.
