Children, Schools, And Inequality Doris R Entwisle, 2018-03-05 Educational sociologists have paid relatively little attention to children in middle childhood ages 6 to 12 whereas developmental psychologists have emphasized factors internal to the child much more than the social contexts in explaining children's development Children Schools and Inequality redresses that imbalance It examines elementary school outcomes e.g. test scores grades retention rates in light of the socioeconomic variation in schools and neighborhoods the organizational patterns across elementary schools and the ways in which family structure intersects with children's school performance Adding data from the Baltimore Beginning School Study to information culled from the fields of sociology child development and education this book suggests why the

gap between the school achievement of poor children and those who are better off has been so difficult to close Doris Enwistle Karl Alexander and Linda Olson show why the first grade transition how children negotiate entry into full time schooling is a crucial period They also show that events over that time have repercussions that echo throughout children s entire school careers Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools Children Schools and Inequality can inform educators practitioners and policymakers as well as researchers in the sociology of education and child development *Improving Our Competitiveness* United States. Too Simple to Fail R. Barker Bausell, 2010-11-01 Too Simple to Fail presents a startling dissection of what is wrong with our educational system and a set of simple common sense steps for improving it Here Bausell demonstrates that classroom instruction is hopelessly obsolete as are our current testing practices both contributing to the widening opportunity gap between socioeconomic and racial groups But with an understanding of what is wrong with education today comes the revelation that the answer to these deficiencies has been available to us all along in the form of the tutorial model the most effective instructional paradigm ever developed The new model presented in this book has implications for identifying not only what is wrong with the way we educate our young but also why it is wrong and how the educational process can be made more efficient effective and fair

Still Not Equal M. Christopher Brown, 2007 Still Not Equal Expanding Educational Opportunity in Society addresses the successes and failures of Brown v Board of Education and the Civil Rights Act of 1964 as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora The educational political and social influence resulting from Brown the Civil Rights Act and their progeny have shaped the dynamics of the collective educational and social experiences of people of color Notwithstanding the obstacles barriers and enablers of educational occupational and economic status outcomes impact the formation and interpretation of public policy specifically and public perception generally about racialized notions of schooling and learning The pursuit of educational access attendance and attainment is intertwined with the implications of academic

research and public policy to improve local practices in school settings Inasmuch as a diverse research agenda priorities and activities become situated to critically address status and attainment outcomes in education from preschool through adulthood for African Americans in the United States and abroad the resulting complexities in education and other settings will continue to behave in ways that cross racial lines
