Ray,Cristina M. Rosell,2017-03-27 The aim of food processing is to produce food that is palatable and tastes good extend its shelf life increase the variety and maintain the nutritional and healthcare quality of food To achieve favorable processing conditions and for the safety of the food to be consumed use of food grade microbial enzymes or microbes being the natural biocatalysts is imperative This book discusses the uses of enzymes in conventional and non conventional food and beverage processing as well as in dairy processing brewing bakery and wine making Apart from conventional uses the development of bioprocessing tools and techniques have significantly expanded the potential for extensive application of enzymes such as in production of

bioactive peptides oligosaccharides and lipids flavor and colorants Some of these developments include extended use of the biocatalysts as immobilized encapsulated enzymes microbes both natural and genetically modified as sources for bulk enzymes solid state fermentation technology for enzyme production Extremophiles and marine microorganisms are another source of food grade enzymes The book throws light on potential applications of microbial enzymes to expand the base of food processing industries

Physical Chemistry of Foods Pieter Walstra,2002-10-08 Exploring the structure and physical and chemical properties of solutions dispersions soft solids fats and cellular systems Physical Chemistry of Foods describes the physicochemical principles of the reactions and conversions that occur during the manufacture handling and storage of foods Coverage progresses from aspects of thermodynamics bonds and interaction forces and reaction kinetics to transport phenomena polymers colloidal interactions nucleation glass transitions and freezing and soft solids This comprehensive volume effectively clarifies the physicochemical processes encountered in food product development

Ingredient Interactions Anilkumar G. Gaonkar,1995-06-05 This work examines how major food ingredients such as water salt hydrocolloids starches lipids proteins flavours and additives interact with other constituents of food and affect food quality with respect to microstructure texture flavour and appearance The intention is to provide new opportunities for food product development It considers both real foods and model food systems

The New Brewer,1999 *Transport Properties of Foods* George D. Saravacos,Zacharias B. Maroulis,2001-06-04 This study covers all the transport properties of food materials and systems exploring viscosity moisture diffusivities thermal conductivity and diffusivity transport and permeability of small molecules and heat and mass transfer coefficients The authors provide physical mathematical or empirical models of the transport processes for each application as well as principal property values and measuring methods for various food products and systems

Safe Handling of Foods Jeffrey M. Farber,Ewen C. Todd,2000-03-03 A discussion of all aspects of safe food handling encompassing the production of all varieties of foods by the processing and foodservice industries where risk factors are likely to occur and what can be done to prepare food safely It examines categories of foods places where food is served and groups of food consumers The text also lists sources of food safety information available on the Internet
