Hysys User Guide University Of Alberta

J Rink

Hysys User Guide University Of Alberta:

Chemical Engineering Progress ,2005 **Characterization and Properties of Petroleum Fractions** M. R. Riazi,2005 The last three chapters of this book deal with application of methods presented in previous chapters to estimate various thermodynamic physical and transport properties of petroleum fractions In this chapter various methods for prediction of physical and thermodynamic properties of pure hydrocarbons and their mixtures petroleum fractions crude oils natural gases and reservoir fluids are presented As it was discussed in Chapters 5 and 6 properties of gases may be estimated more accurately than properties of liquids Theoretical methods of Chapters 5 and 6 for estimation of thermophysical properties generally can be applied to both liquids and gases however more accurate properties can be predicted through empirical correlations particularly developed for liquids When these correlations are developed with some theoretical basis they are more accurate and have wider range of applications In this chapter some of these semitheoretical correlations are presented Methods presented in Chapters 5 and 6 can be used to estimate properties such as density enthalpy heat capacity heat of vaporization and vapor pressure Characterization methods of Chapters 2 4 are used to determine the input parameters needed for various predictive methods One important part of this chapter is prediction of vapor pressure that is needed for vapor liquid equilibrium calculations of Chapter 9 Role of Chemical Engineering in Processing of Minerals and Materials ,2003 *Chemical Engineering Education* ,1999 **Green Catalysis and Reaction Engineering** Bala Subramaniam,2022-09-29 Discover tools to perform Life Cycle Analysis LCA and develop sustainable chemical technologies in this valuable guide for chemists engineers and practitioners Tackling one of the key challenges of modern industrial chemical engineering this book introduces tools to assess the environmental footprint and economics of key chemical processes that make the ingredients of everyday products such as plastics synthetic fibers detergents and fuels Describing diverse industrial processes in detail it provides process flow diagrams including raw material sourcing catalytic reactors separation units process equipment and recycle streams The book clearly explains elements of LCA and how various software tools available in the public domain and commercially can be used to perform LCA Supported by real world practical examples and case studies provided by industrial and academic chemists and chemical engineers this is an essential tool for readers involved in implementing LCA and developing next generation sustainable chemical technologies
