Globalisation and African Languages Katrin Bromber, Birgit Smieja, 2011-07-20 Globalisation and African Languages links African language studies to the concept of globalisation which increasingly undergoes critical review Hence African linguists of various provenience can make valuable contributions to this debate In cultural matters which by definition include language there is often a sense that globalisation leads to a major trend of homogenisation which results in a reduction of diversity on the one hand and on the other in new themes being incorporated into global cultural patterns However often conflicting and overlapping particularistic interests exist which have a constructive as well as destructive potential This aspect leads directly to the first of three sections of this volume LANGUAGE USE AND ATTITUDES which addresses some of the burning issues in sociolinguistic research Since this research area is tightly linked to the educational domain these important issues are addressed in articles that comprise the second section of this volume LANGUAGE POLICY AND EDUCATION The third section of the volume presents articles dealing with LANGUAGE DESCRIPTION AND CLASSIFICATION demonstrating which parts of different language systems are affected through contact under historical and modern conditions The contributions of all the well known scholars in this volume show that globalisation is a two way street and to ensure that all sides benefit in a reciprocal manner means the impacts have to be monitored globally regionally nationally and locally By disseminating and emphasising these linguistic findings as part of the global cultural heritage African language studies may offer urgently needed new perspectives towards a rapidly changing world **Innovative Algorithms and Techniques in Automation, Industrial Electronics and Telecommunications** Tarek Sobh, Khaled Elleithy, Ausif Mahmood, Mohamed Karim, 2007-09-04 Innovative Algorithms and Techniques in Automation Industrial Electronics and Telecommunications includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Industrial Electronics Technology not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn

granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session
