Robert Irwin, James Turrell Michael Govan,Anna Bernardini,John aBowsher,Giuseppe Panza,2014 The work of two central figures associated with West Coast contemporary art Robert Irwin and James Turrell is the subject of this breathtaking book that explores collaboration artistic evolution and themes of light space and perception Robert Irwin and James Turrell both originally from Los Angeles are among the most recognized artists to have emerged in the 1960s Irwin has worked in a variety of media while Turrell s work is characterized by his engagement with pure light One of the first champions of Irwin and Turrell s work was Giuseppe Panza who commissioned installations for his 19th century mansion in Northern Italy now an art museum part of FAI Fondo Ambiente Italiano Those installations are the focus of this book the first to pair these two important artists Opening with essays that examine the artists seminal careers and trace their relationship to Panza this volume examines both the original 1973 installations in the villa and recent works made specifically for the building s architecture Irwin s new installation moves from inside to outside through a row of vertical openings and a series of semi transparent planes and Turrell s large Ganzfeld immerses viewers in radiant colored light Through numerous illustrations and informative text the book shows how both artists have extended and refined their earlier work using the latest technology Light as Experience and Imagination from Medieval to Modern Times David S. Herrstrom,2022-11-21 In Light as Experience and Imagination from Medieval to Modern Times David S Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times The true subject of the book is making sense of the individual s relationship with light rather than the investigation of light s essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions as reflected in art architecture and literature Instead of its evolution this book celebrates the complexity of our relation to light s character No individual experience of light being truer than any other *James Turrell* Carmen Giménez,Nat Trotman,Arthur Zajonc,2013 Known internationally for his mesmerizing light installations James Turrell has investigated the ways we perceive light colour and space for over forty years His meditative works encourage a state of reflexive vision in which one apprehends the function of one s own senses and the materiality of light For the artist s first exhibition in a New York museum since 1980 Turrell will offer such an experience through a major site specific project for the Guggenheim giving shape to the air and light that occupy the museum s central void Organized in conjunction with the Los Angeles County Museum of Art and the Museum of Fine Arts Houston James Turrell comprises onethird of a major retrospective exhibition spanning the United States during summer 2013 In addition to an extensive plates section featuring Turrell s early works his magnum opus Roden Crater 1976 renderings for his installation for the Guggenheim rotunda and

The Interiors Theory Primer William Mangold, 2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves The Interiors Theory Primer maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship The Interiors Theory Primer offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply

embedded in the human condition Accessible to students useful to professionals and provocative for scholars The Interiors Theory Primer argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional qualities but also for their powerful role in shaping contemporary life **Eros and Illness** David B. Morris, 2017-02-27 When we or our loved ones fall ill our world is thrown into disarray our routines are interrupted our beliefs shaken David Morris offers an unconventional deeply human exploration of what it means to live with and live through disease He shows how desire emotions dreams stories romance even eroticism plays a crucial part in illness

Atmospheres of Projection Giuliana Bruno, 2022-10-13 Following on the success of *Surface* Bruno's previous book with us in this new one she explores the act and art of projection in its manifold guises and what those can tell us about how we think and feel and create the world we inhabit This is not just an exploration of the psychological operation of projection the idea that we cast onto others the qualities we refuse to acknowledge in ourselves It is a major work of cultural history and media archaeology As a way to transform space and atmosphere projection has a long history in the arts dating back to shadow plays camera obscuras magic lantern shows and phantasmagoria But the atmosphere of projection is not a thing of the past alone It is alive and well today It continues to fascinate us as screens filled with moving figures pervade the spaces of the art gallery and the museum as well as the environments of our daily lives What is the root of our fascination How does it manifest in contemporary art How do we define atmosphere How is projection an atmosphere Are these two modalities conceptually and historically related and how so Why are artists today so interested in environments and in elements of projection To explain this continual fascination with projection and atmosphere Bruno traverses psychoanalysis architecture the history of science visual art and moving image culture to see how projective mechanisms and their environments have developed over time

A Primer for Forgetting Lewis Hyde, 2019-06-18 One of our true superstars of nonfiction David Foster Wallace Lewis Hyde offers a playful and inspiring defense of forgetfulness by exploring the healing effect it can have on the human psyche We live in a culture that prizes memory how much we can store the quality of what's preserved how we might better document and retain the moments of our life while fighting off the nightmare of losing all that we have experienced But what if forgetfulness were seen not as something to fear be it in the form of illness or simple absentmindedness but rather as a blessing a balm a path to peace and rebirth *A Primer for Forgetting* is a remarkable experiment in scholarship autobiography and social criticism by the author of the classics *The Gift* and *Trickster Makes This World* It forges a new vision of forgetfulness by assembling fragments of art and writing from the ancient world to the modern weighing the potential boons forgetfulness might offer the present moment as a creative and political force It also turns inward using the author's own life and memory as a canvas upon which to extol the virtues of a concept too long taken as an evil Drawing material from Hesiod to Jorge Luis Borges to Elizabeth Bishop to Archbishop Desmond Tutu from myths and legends to very real and recent traumas both personal and historical *A Primer for Forgetting* is a unique and remarkable

synthesis that only Lewis Hyde could have produced *Light on Fire* Gabrielle Selz, 2021-10-19 The first in depth biography of Sam Francis the legendary American abstract painter who broke all the rules in his personal and artistic life *Light on Fire* is the first comprehensive biography of Sam Francis one of the most important American abstract artists of the twentieth century Based on Gabrielle Selz's unprecedented access to Francis's files as well as private correspondence and hundreds of interviews this book traces the extraordinary and ultimately tragic journey of a complex and charismatic artist who first learned to paint as a former air corps pilot encased for three years in a full body cast While still a young man Francis saw his color saturated paintings fetch the highest prices of any living artist His restless desire resulted in five marriages and homes on three continents his entrepreneurial spirit led to founding a museum a publishing company a reforestation program and several nonprofits *Light on Fire* captures the art life personality and talent of a man whom the art historian and museum director William C Agee described as a rare artist participating in the visionary reconstruction of art history defying creative boundaries among the likes of Jackson Pollock Mark Rothko and Willem de Kooning With settings from World War II San Francisco to postwar Paris New York Tokyo and Los Angeles Selz crafts an intimate portrait of a man who sought to resolve in art the contradictions he couldn't resolve in life **A Phenomenological Interpretation of Schizophrenia** Pierluigi

Parisi, 2024-11-04 In this book the author develops a novel philosophically psychopathologically founded theory of schizophrenia and its basic disorder After the introduction with the presentation of the basic concept the further study is divided into five chapters each of which first gives a conceptual overview then includes and analyzes clinical phenomena and research results in detail The originality and creativity of the work essentially consists in using the terms mentioned as *passé partout* as it were which allow the most diverse often disparate phenomena and symptoms of schizophrenia to be viewed from an integrating point of view The method used is phenomenological descriptive and interpretative drawing on a wealth of empirical research results but at the same time being re-viewed and reorganized in the subjective perspective framework concept *Attention* Gay Watson, 2024-10-13 A suitably engrossing investigation of attention through many disciplines and ways of life from neuroscience to surfing If there is one thing we are short on these days it's attention Attention is central to everything we do and think yet it is mostly an intangible force an invisible thing that connects us as subjects with the world around us We pay attention to this or that let our attention wander we even stand at attention from time to time yet rarely do we attend to attention itself In this book Gay Watson does just that musing on attention as one of our most human impulses As Watson shows the way we think about attention is usually through its instrumentality by what can be achieved if we give something enough of it say a crisply written report a newly built bookcase or even a satisfied child who has yearned for engagement Yet in losing ourselves to the objects of our fixation we often neglect the process of attention itself Exploring everything from attention's effects on our neurons to attention deficit disorder from the mindfulness movement to the relationship between attention and creativity Watson examines attention in action through many disciplines and ways of life

Along the way she offers interviews with an astonishing cast of creative people from composers to poets to artists to psychologists including John Luther Adams Stephen Batchelor Sue Blackmore Guy Claxton Edmund de Waal Rick Hanson Jane Hirshfield Wayne Macgregor Iain McGilchrist Garry Fabian Miller Alice and Peter Oswald Ruth Ozeki and James Turrell A valuable and timely account of something central to our lives yet all too often neglected this book will appeal to anyone who has felt their attention under threat in the clamors of modern life
