Autonomy and Independence Lili Liu, Christine Daum, Noëlle Neubauer, Antonio Miguel Cruz, Adriana Ríos Rincón, 2022-01-20 This book looks at how AgeTech can support the autonomy and independence of people as they grow older. The authors challenge readers to reflect on the concepts of autonomy and independence not as absolutes but as experiences situated within older adults' social connections and environments. Eleven personas of people around the world provide the context for readers to consider the influence of culture and values on how we understand autonomy and independence and the potential role of technology-based supports. The global pandemic provides a backdrop for the unprecedentedly rapid adoption of AgeTech such as information and communication technologies or mobile applications that benefit older adults. Each persona in the book demonstrates the opportunity for AgeTech to facilitate autonomy and independence in supporting one's identity, decision making, advance care planning, self-care, health management, economic and social participation, enjoyment and self-fulfillment and mobility in the community. The book features AgeTech from around the world to provide examples of commercially available products as well as research and development within the field. Despite the promise of AgeTech, the book highlights the digital divide where some older people experience inadequate access to technology due to their geographic location, socio-economic status and age. This book is accessible and relevant to everyday readers. Older adults will recognize themselves or peers in the personas and may glean insight from the solutions. Care partners and service providers will identify with the challenges of the personas. AgeTech entrepreneurs especially

seniorpreneurs will appreciate that their endeavours represent a growing trend Researchers will be reminded that the most important research questions are those that will enhance the quality of life of older adults and their sense of autonomy and independence or relational autonomy and interdependence *The Future of Energy Efficiency in Post-COVID-19 Era* Muhammad Mohsin, Yu Hao, Abdul Khaliq Rasheed, Muhammad Irfan, FengSheng Chien, 2025-02-10 The COVID 19 pandemic has led several governments to impose movement control resulting in serious challenges towards the research development and commercialization of sustainable energy generation and conversion technologies As a result of the economic slowdown in many parts of the world the poor are in distress Experts believe that a fast recovery from the COVID 19 epidemic or any future disaster will need clean and sustainable energy However questions arise on what type of renewable energy technologies will ensure our resilience in the face of future disasters like COVID 19 that aids rebuilding economies and puts nations on track to meet global climate and sustainable development goals Therefore this Research Topic primarily aims at compiling recent progress on energy generation conversion and resource utilization that would help resolve energy problems amidst and post Covid 19 pandemic *Wayfarers* G.
