

JAX-RPC (contd.)

- ◆ JAX-RPC is designed to provide a simple way for developers to create Web services server and Web services client.
- ◆ Based on remote procedure calls; so the programming model is familiar to Java developers who have used RMI or CORBA.
- ◆ Major difference between RMI and JAX-RPC is that messages exchanged are encoded in XML based protocol and can be carried over a variety of transport protocols such as HTTP, SMTP etc.
- ◆ You can use JAX-RPC without having to be an expert in XML, SOAP, or HTTP.
