The Kamewa type A system is a development of a successful and well-proven design. The improvements it incorporates will ensure that it continues as market leader. Detailed requirements from different parts of the marine market have been taken into account so that the new type A hub is suitable for a wide range of applications.

Design tools such as finite elements for detailed analysis of all components have resulted in a number of design improvements that significantly improve the strength of the hub and its moving parts to provide a longer service life.

The new hub shape developed with modern CFD tools also reduces drag, which gives benefits in propulsive performance.

Based on this new developed hub, Kamewa type A will cover a range of applications and will be offered in two options depending on the ship speed. The standard type A hub is ideal for speed up to 30 knots and for higher speed an H1 hub will be available.

The Kamewa type A is available in N/A1 bronze or stainless steel and is optimised for all types of installation, from no ice to highest ice class throughout the speed range.

Underwater replacement of blades as well as a feathering design are optional features.

The type A propeller is delivered with a hydraulic system, of up to date design with load sensing displacement pumps that limit noise and vibration, and reduce energy consumption.

The components are also easy accessible for maintenance and service.

The Kamewa type A-D system fulfils Naval standards, including shock requirements.

The new type A is suitable for all kind of vessels such as

- cargo vessels
- container vessels
- cruise ships
- fast ferries
- naval vessels
- offshore vessels
- tankers
- yachts
