The Instability of Truth exposes the myriad ways our minds can be controlled against our will from the brainwashing techniques used against American POWs in North Korea to the soft brainwashing of social media doomscrolling and behavior shaping. In our increasingly data driven world anyone can fall victim to mind control. Lemov identifies invasive forms of emotional engineering that exploit trauma and addiction to coerce and persuade in everyday life. Tracing the word brainwashing from deep in the files of an operative of the U S Office of Strategic Services in the 1950s to the pioneering research of Robert Jay Lifton to the public trials of cult leaders and the case of Patty Hearst, Lemov also studies how the idea of mind control has spread across the globe and penetrated courtrooms, secret labs, military schools and today's digital sites. The Instability of Truth offers lessons from mind control episodes past and present. Truth is always subject to question in more mundane walks of life than most people believe and Lemov equips us for the increasing challenges we face from social media, AI and an unprecedented global form of surveillance capitalism. The Instability of Truth develops a rigorous new understanding of both brainwashing's paradoxes and its emotional roots by giving voice to brainwashers, the brainwashed and third party observers alike.
