International Conference for the Psychology of Mathematics Education ,1998**

Psychological Assessment in South Africa Sumaya Laher,Kate Cockcroft,2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments Psychological Assessment in South Africa provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists psychometrists remedial teachers and human resource practitioners *The Politics and Governance of Basic Education* Brian Levy,Robert Cameron,Ursula Hoadley,Vinothan Naidoo,2018-09-05 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations All over the world economic inclusion has risen to the top of the development discourse A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education Using the vivid example of South Africa a country that had ambitious goals at the outset of its transition from apartheid to democracy it explores how the interaction of politics and institutions affects educational outcomes By examining lessons learned from how South Africa failed to achieve many of its goals it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re orient the system towards learning *Teacher Education Systems in Africa in the Digital Era* Bade

South Africa Pushed to the Limit Hein Marais,2011-01-13 Since 1994 the democratic government in South Africa has worked hard at improving the lives of the black majority yet close to half the population lives in poverty jobs are scarce and the country is more unequal than ever For millions the colour of people s skin still decides their destiny In his wide ranging incisive and provocative analysis Hein Marais shows that although the legacies of apartheid and colonialism weigh heavy many of the strategic choices made since the early 1990s have compounded those handicaps Marais explains why those choices were made where they went awry and why South Africa s vaunted formations of the left old and new have failed to prevent or alter them From the real reasons behind President Jacob Zuma s rise and the purging of his predecessor Thabo Mbeki to a devastating critique of the country s continuing AIDS crisis its economic path and its approach to the rights and entitlements of citizens South Africa Pushed to the Limit presents a riveting benchmark analysis of the incomplete journey beyond apartheid

South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it

is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI *Taking Power in the Economy* Susan Brown,Alta Fölscher,2004 Covers trends from the mid1990s to 2002 **Sociological Abstracts** Leo P.
