The People of the State of Illinois V. Timmsen ,2014 **Emerging Infectious Diseases** ,2016 Hits and Misses in the Baseball Draft Alan Maimon, Chuck Myron, 2014-02-07 If unpredictability is so much of what makes sports compelling the baseball draft might be the best place to look This book explores the intricate uncertainties of the draft and the people who face it Since the modern draft began in 1965 major league teams have attempted with varying degrees of success to identify and develop stars of the future Whether because of injury poor performance or mental and physical struggles a large percentage of the most ballyhooed prospects never reach the game s highest level Though teams have improved in recent years at turning top picks into major leaguers the baseball draft is still centered on educated guesswork This book explains why **Eco-efficient Materials for Mitigating Building Cooling Needs** F. Pacheco-Torgal, Joao Labrincha, Luisa F. Cabeza, Claes-Göran Granqvist, 2015-02-27 Climate change is one of the most important environmental problems faced by Planet Earth The majority of CO2 emissions come from burning fossil fuels for energy production and improvements in

energy efficiency shows the greatest potential for any single strategy to abate global greenhouse gas GHG emissions from the energy sector Energy related emissions account for almost 80% of the EU s total greenhouse gas emissions The building sector is the largest energy user responsible for about 40% of the EU s total final energy consumption In Europe the number of installed air conditioning systems has increased 500% over the last 20 years but in that same period energy cooling needs have increased more than 20 times The increase in energy cooling needs relates to the current higher living and working standards In urban environments with low outdoor air quality the general case this means that in summer time one cannot count on natural ventilation to reduce cooling needs Do not forget the synergistic effect between heat waves and air pollution which means that outdoor air quality is worse in the summer aggravating cooling needs Over the next few years this phenomenon will become much worse because more people will live in cities more than 2 billion by 2050 and global warming will aggravate cooling needs An overview of materials to lessen the impact of urban heat islands Excellent coverage of building materials to reduce air conditioning needs Innovative products discussed such as Thermo and Electrochromic materials
