idiographic measures that are tailored to the needs of an individual. The issue of replication and generalising beyond an individual are examined and the book also includes a section on the meta analysis of single case data. The critical evaluation of single case research is examined from both the perspective of developing quality standards to evaluate research and maintaining a critical distance in reviewing one's own work. *Single Case Methods in Clinical Psychology* will provide invaluable guidance to postgraduate psychologists training to enter the professions of clinical health and counselling psychology and is likely to become a core text on many courses.
