Flexibility is as acceptable an objective for today's industrial community as is automation. Thus the title of this conference proceedings volume *Flexible Automation* reflects an added emphasis to the usual industrial automation. As with general automation that has impacted every component of the manufacturing office and plant, the identity of flexible automation can possess various forms and functions. The papers in this volume have been grouped into two main categories. One category deals with implementation of so-called intelligent manufacturing. This means use of algorithmic methods and artificial intelligence approaches to various problems encountered in practical factory automation tasks. The placement of papers into five chapters of this part cannot be very precise due to multidisciplinary nature and constant rapid change of the field. The categories are arranged starting from problems of enhancement of current factory settings and followed by the papers addressing more specific issues of production planning, process technology, and product engineering. The fifth chapter contains papers on the very important aspects of factory automation problems of design, simulation, operation, and monitoring of manufacturing cells. Cavas-Martínez,Félix Sanz-Adan,Paz Morer Camo,Ruben Lostado Lorza,Jacinto Santamaría Peña,2020-03-09 This book gathers the papers presented at the XXIX International Congress INGEGRAF. The digital transformation in graphic engineering, which was held in Logroño, Spain, on June 20-21, 2019. It reports on cutting-edge topics in product design and manufacturing, such as industrial methods for integrated product and process design, innovative design, and computer-aided design. Further topics covered include virtual simulation and reverse engineering, additive manufacturing, product manufacturing engineering methods in medicine and education, representation techniques, and design and modeling for nautical engineering and construction, aeronautics, and aerospace contexts. The book is divided into six main sections reflecting the focus and primary themes of the conference. The contributions presented here will not only provide researchers, engineers, and experts in a range of industrial engineering subfields with extensive information to support them in their daily work but will also stimulate new research directions, advanced applications of the methods discussed, and future interdisciplinary collaborations. *Thomas Register of American Manufacturers* ,2003 Vols for 1970-71 includes manufacturers catalogs *International Journal of the Japan Society for Precision Engineering* ,1994 *Materials World* ,2002 *American Machinist & Automated Manufacturing* ,1988 **Automation** ,1988 Machinery Buyers' Guide ,2001
