The Modern Language Association (MLA) provides guidelines for documentation style. This template is based on commonly used guidelines from the MLA Handbook (8th edition). For the most up to date information about MLA style and publications, go to the MLA website at: www.mla.org. In MLA format, titles are centered and written in 12-point, easy-to-read fonts like Times New Roman. The title is not bolded, underlined, or italicized. In addition, MLA format requires double-spacing throughout a document.

In MLA format, quotations with fewer than four lines of prose or three lines of verse are quoted directly in the sentence. These lines must be enclosed in quotation marks, followed by the author's last name and the page or pages of the source from which you are quoting in parenthesis, for example: "inline quotation here" (AuthorLastName 31). Note: The end punctuation follows the parenthesis.

On the other hand, quotations that are longer than four lines of prose or three lines of verse follow different guidelines. These quotations are introduced with a colon:

Start long quotations on a new line. Indent the quote one inch from the left margin. Double-space the lines and omit quotation marks. Reference the source as you would for a shorter quotation. To quickly format a quotation of over four lines or three lines of verse, use the Long quotation style provided in this

Critical Thinking Within the Library Program John Spencer, Christopher Millson-Martula, 2014-10-20 While academic librarians frequently discuss critical thinking and its relationship to information literacy, the literature does not contain an abundance of sources on the topic. Therefore, this work provides a current and timely perspective on the possible roles of critical thinking within the library program. The work contains a variety of approaches likely to benefit the practicing librarian. It begins with a review of the literature, followed by theoretical approaches involving constructivism and the Socratic method. Readers will find pieces on the integration of critical thinking into the first-year experience and course-specific case studies, as well as a selection on a campus-wide critical thinking project. In each of the pieces, librarians are exploring new ways to meet their instructional goals, including the goal of teaching critical thinking skills to students across the curriculum. This book was originally published as a special issue of *College*
