Title of Paper

The purpose of this paper is twofold: 1) to inform students of MLA Style's formatting and citation guidelines, and 2) to offer students an easy-to-use template to format their own papers. To use this document as a template, simply click "Save As," retitle, and plug in the actual content of your paper (don't forget all the little details like the header and heading). Keep the original file for reference—it's a helpful resource! When writing within your new document, be careful not to erase the template's pre-set formatting.

MLA Style refers to two major aspects of your paper: 1) *formatting* and 2) *citations*. *Formatting* refers to how your paper looks: specific rules for margins, spacing, font style, headers, order of information, punctuation—that kind of stuff. *Citation* refers to the ways you share information about your research in the paper itself. Let's first overview formatting guidelines—that's easy—and then move onto the juicier topic of citation.

Every MLA paper contains a header, a heading, a paper title, and the text itself. The header includes the writer's last name and the page number. When you put that information in the header, it automatically populates above every other page. To make Word automatically paginate your paper, click into the Header and then, from the menu bar, select Insert→Page Number→Current Position. Also notice that the first page of the

Hirvela, Diane Belcher, 2021-12-13

Argumentative Writing in a Second Language is a collection on teaching argumentative writing offering multiple vantage points drawn from the contributors own teaching and research experiences The value of learning how to compose argumentative texts cannot be overstated and yet very little attention has been allocated to the equally important topic of how argumentation is or can be taught in the L2 context Thus this volume shifts attention to teachers and argumentative writing instruction especially within increasingly common multimodal and digital literacy settings While doing so it provides a comprehensive wide ranging view of the L2 argumentative writing landscape within an instructional lens Part I of the volume is topic oriented and focuses on explorations of important issues and perspectives while Part II features several chapters reporting classroom based studies of a variety of instructional approaches that expand our understanding of how argumentative writing can be taught The book will be of value to pre service and in service teachers in varying instructional contexts as well as teacher educators and L2 writing scholars researchers **Writing Argumentative Essays** Nancy V.

Wood, 2000-05 This brief rhetoric helps students develop strategies for critical reading critical thinking research and writing that will help them argue clearly and convincingly It teaches them to identify and develop arguments to read and form reactions and opinions of their own to analyze an audience to seek common ground and to use a wide realistic range of techniques to write argument papers that express their individual views and original perspectives on modern issues It includes clear explanations and examples of argument theory and reading and writing processes research and documentation skills and offers engaging class tested writing assignments and activities 49 Essays for Analysis cover several broad issue and sub issue areas all of contemporary concern Unique chapters discuss student argument styles Rogerian argument and argument and literature The Broadview Pocket Guide to Writing: A Concise Handbook for Students - Fourth Edition

Spencer,2009-02-01 Our goal in writing this book was to validate teachers for strong efforts in their life s work We often observe teachers frustrations with what they perceive to be a multitude of different hot topics in education that they must attend to now but which they expect to come and go like the last hot topics So we wanted to help readers see similarities between many of these hot topics differentiation multiple intelligences culturally responsive teaching brain friendly strategies authentic assessment and ethical classroom management which we feel are not flashes in the pan And we trust that serious practitioners will not oversimplify the findings of neuroscientists and their application to education Reading studies and books by scientists a number of which are user friendly can help ensure that teachers separate the hype from credible information We have seen this professionally judicious approach in the work of graduate students Kolinski 2007 in adopting brain friendly strategies We have intentionally packed both theoretical research based and practical information in this book because professional educators want to know why they should use certain approaches models and strategies In turn as professionals we should be able to explain why we teach the way we do not to justify but to educate others about our knowledge based reflective decision making processes and the impact on student learning Thus it is important to read Chapter 1 because it lays a foundation Each succeeding chapter 2 6 has unique and compelling twists and turns chock full of ideas to use or to adapt It is possible to gain lots of ideas processes and strategies from reading and implementing or adapting even one of the unit chapters or a part of it While some of the units are explicitly about literacy others focus on content using reading writing speaking and listening as critical in the learning process Thus literacy skills are reinforced and strengthened Additionally some of our colleagues and public school partners have given us feedback that they wanted to implement some of the units and activities themselves So feel free to use this book for self exploration and
