

Free-Particle Model Worksheet 2:

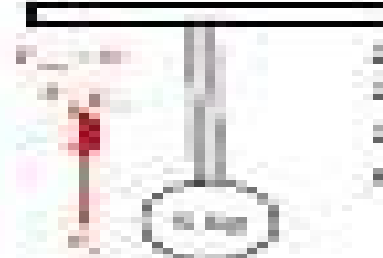

Quantitative Force Analysis & Vector Components

Worked example right, with the procedure for all problems:

1. Determine what forces are present in each system. Draw a force diagram, finding systems together solving 1-4 problems.
 (Case A = ball suspended between cables; Case B = ball suspended by two cables)

$F_{\text{cable}} = F_g = 100 \text{ N}$
 $F_{\text{cable}} = 100 \text{ N}$
 $F_g = 100 \text{ N}$
 $F_g = 100 \text{ N}$

$F_{\text{cable}} = F_g = 100 \text{ N}$
 $F_{\text{cable}} = 100 \text{ N}$
 $F_g = 100 \text{ N}$
 $F_g = 100 \text{ N}$

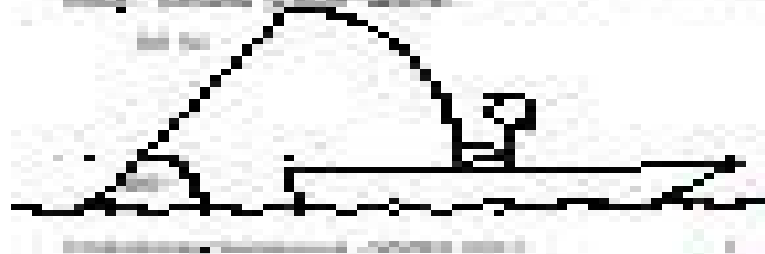

2. Determine forces on each cable

Ball on right:
 $F_{\text{cable1}} = F_{\text{cable2}} = 100 \text{ N}$
 $F_{\text{cable1}} = 100 \text{ N}$
 $F_{\text{cable2}} = 100 \text{ N}$
 $F_g = 100 \text{ N}$

Top right:
 $F_{\text{cable1}} = F_{\text{cable2}} + F_g = 100 \text{ N}$
 $F_{\text{cable1}} = 100 \text{ N}$
 $F_{\text{cable2}} = 100 \text{ N}$
 $F_g = 100 \text{ N}$

3. Draw free-body diagram and vector components of the forces in that situation. Show your work.

$F_g = 100 \text{ N}$
 $F_N = 100 \text{ N}$
 $F_f = 100 \text{ N}$

$F_g = 100 \text{ N}$
 $F_N = 86.6 \text{ N}$
 $F_f = 50 \text{ N}$

Canada's Mechanized Infantry Peter Kasurak, 2020-02-01 Canada's Mechanized Infantry explores the largely ignored development of the infantry in the Canadian Army after the First World War. Although many modern studies of technology and war focus on tanks and armour soldiers from the Second World War onward have discovered that success really depends on a combination of infantry, armour, and artillery to form combat teams. Peter Kasurak demonstrates how the army implemented successful infantry vehicles and doctrine to ultimately further its military goals during the Second World War. In the postwar period, however, progress was slowed by a top-down culture and an unwillingness to abandon conventional thinking on the primacy of foot infantry and regimental organization. This insightful book is the first to examine the challenges that have confronted the Canadian Army in transforming its infantry from First World War foot soldiers into a twenty-first century combat force integrating soldiers, vehicles, weapons, and electronics.

Greening Europe Floriana Cerniglia, Francesco Saraceno, 2022-12-12 The third installment of the European Public Investment Outlook series is an important and timely publication that draws together recent analyses to recommend significant increases in public investment in green ventures. Compelling data from key economists affiliated with international organizations like the International Monetary Fund, European Investment Bank, and the European Commission, as well as academic departments and policy institutes, are a clarion call for green investment to boost the economy and put the planet on a sustainable path. Like its predecessors, the book presents the issues in a lucid and navigable manner. Part I explores the

EU's current levels of green public investment as well as the challenges ahead in achieving net zero carbon emissions after years of decreasing funding and the obstacles presented by the COVID 19 pandemic and the Russian invasion of Ukraine. The public investment trends of France, Germany, Italy, and Spain are systematically evaluated as well as the REPowerEU policy accelerated in Spring 2022 to move away from Russia's supply of fossil fuels. Part II focuses on the investment needed for green transition, the important economic and fiscal effects and benefits this would bring, and the reality of what is required before 2030 to achieve the EU's carbon neutral targets by 2050. *Greening Europe* is essential reading for economists, environmentalists, and policymakers. It should also be of interest to anyone who wants to understand the cost implications of the carbon neutral policies that governments have promised and the urgent need to change our approach towards energy usage.

In Situ Recovery & Remediation of Metals Drummond Earley III, 2020-03-27. Current trends in mining are driving the demand for subsurface extraction technologies with low surface impacts that protect surface and ground water. Moreover, the necessity for sustainable mineral extraction technologies has increased as regulatory restrictions and technical challenges to traditional mining grow with production from deeper and deeper remaining metal resources. This book provides a state-of-the-art synopsis of in situ metal recovery and remediation technologies based on both research and commercial projects. In situ recovery uses fluid-based metal dissolution and recovery to extract one or more commodities from a largely intact rock mass using similar processes that create ore deposits. The fluid is circulated through ore by gravity and/or pumps using injection and recovery wells. A processing facility is usually established at the surface of the operation to extract the commodity of interest. The barren fluid is then recirculated back into the recovery circuit. In situ remediation uses similar wellfield technology and chemical processes to stabilize metal contaminants by injecting agents that form stable solids or less toxic species when combined with a contaminant. The fluid depleted in the stabilizing agent is then pumped back to the surface and regenerated. In situ mining or recovery has been successfully applied to several commodities including uranium, sulfur, evaporites, and copper, which have favorable chemical properties and deposit types for in situ recovery.

Gerontechnologies for Home Support Alexander Moreno, Sumi Helal, Henk Herman Nap, Gloria M. Gutman, 2024-10-07. In recent years, various digital and non-digital gerontechnology applications in home support have been developed. From medication administration aids (e.g., reminders and alarms) to environmental monitoring (e.g., air quality sensors and cameras), fall detection, and health and activity monitoring (e.g., smartwatch), these promising solutions are in the works or already in the marketplace. Additionally, the COVID 19 pandemic has accelerated the development and deployment of technological solutions supporting remote care and communication (e.g., video calls) and home service delivery (e.g., meals and groceries), both of which have been developed to facilitate aging in place. This is significant, especially as avoiding the institutionalization of older adults has become a major goal of governments and caring families around the world. These technologies are a potential solution to help older adults and family caregivers age at home, maintain autonomy, and

independence and avoid social isolation These technologies can reduce the workload of professional caregivers It is crucial to update our knowledge on evidence based technologies for home support tested simultaneously in older adults and their family caregivers Healthcare professionals and families are often disadvantaged by a lack of information demonstrating their utility and cost effectiveness This article collection focuses on providing evidence based information about emerging and existing gerontechnologies which is essential to make an informed decision in recommending their use or deciding to purchase them For older adults it will provide proofs upon which to make an informed decision to invest in a specific technology when needed For family caregivers it will improve their judgment when trying to choose purchase and adopt a technology aiming to solve a problem at home and have peace of mind when these technologies are used to support their loved ones For clinicians it will provide a pool of evidence based technological tools that could be recommended to families facing the loss of autonomy and independence of older adults For researchers and scholars it will provide a base of knowledge for future applied research in gerontechnology Finally improving the evidence in gerontechnology will help to provide cues for policymakers and governments to create legislation aiming to protect the public and the end users of these technologies

Hart, Fuller, and Everything After Allan C Hutchinson,2023-02-23 More has been said about the Hart Fuller debate than can be considered healthy or productive even within the precious world of jurisprudential scholarship too much philosophising about how law has revelled in its own abstractness and narrowness But the mission of this book is distinctly and determinedly different it is not to rework these already rehashed ideas but to reject them entirely Rather than add to the massive jurisprudential literature that has been generated by all and sundry the book criticises and abandons the project that Hart and Fuller set in motion It contends that the turn that was taken in 1957 has led down a series of cul de sacs blind alleys and dead ends to nowhere useful or illuminating It is more than past time to leave their debate behind and strike out in an entirely new and more promising direction The book insists that not only law but also all theorising about law is political in all its derivations dimensions and directions
