Materials and Technologies for Future Advancement Azman Ismail, Fatin Nur Zulkipli, Syajaratunnur Yaakup, Andreas Öchsner, 2023-10-07 This book is a platform to publish new progress in the field of materials and technologies that can offer significant developments with the possibility of changing the future. These emerging developments will change the way we live now at an unprecedented pace across our society. It is important to note that such modern developments are no longer restricted to a single discipline but are the outcome of a multidisciplinary approach which combines many different engineering disciplines. This book explores the new technology landscape that will have the direct impact on production related sectors individually and in combination with different disciplines. A major driver for this actual research is the efficiency many times connected with a focus on environmental sustainability **High-speed Surface Craft**, 1987

Seaforth World Naval Review 2024 Conrad Waters, 2023-12-30 For more than a decade this annual volume has provided an authoritative summary of all the developments in the world's navies and their ships in the previous twelve months. It combines regional surveys with major articles on important new warships and looks at wider issues of significance to navies such as aviation and weaponry. The contributors come from around the globe and as well as providing a balanced picture of naval developments they interpret their significance and explain their context. As well as its regular regional reviews the 2024 volume focusses on three fleets: the Brazilian Navy, the Hellenic Navy and the Royal Navy. There are in-depth articles on the French Auguste Bené class of overseas patrol vessels, the Indian P15A/P15B Kolkata Visakhapatnam class destroyers and the Spanish S-80 Class Isaac Peral class submarines. The third regular section of the volume is devoted to reviews of important technological developments around the world. David Hobbs looks at aspects of naval aviation and focusses on US unmanned systems. Norman Friedman outlines developments in naval propulsion systems while Richard Scott analyzes the Kongsberg Raytheon naval strike missile. Now firmly established as the only annual naval overview of its type in the world, The Seaforth World Naval Review is essential reading for professional and enthusiast alike. It takes the reader to the heart of contemporary maritime affairs; this is a marvelous asset for those wishing to keep up to date with naval matters. Very highly recommended. *Warship World* *Fast Ferry International*, 1998 *Naval Fast Strike Craft and Patrol Boats* Roy
