Microsoft Excel Functions and Formulas Brian Moriarty, Bernd Held, Theodor Richardson, 2022-05-27 No detailed description available for Microsoft Excel Functions and Formulas [Mathematics for Secondary School Teachers](#) Elizabeth G. Bremigan, Ralph J. Bremigan, John D. Lorch, 2011 Mathematics for Secondary School Teachers discusses topics of central importance in the secondary school mathematics curriculum including functions polynomials trigonometry exponential and logarithmic functions number and operation and measurement Acknowledging diversity in the mathematical backgrounds of pre service teachers and in the goals of teacher preparation programs the authors have written a flexible text through which

instructors can emphasize any of the following Basics exploration of key pre college topics from intuitive and rigorous points of view Connections exploration of relationships among topics using tools from college level mathematics Extensions exploration of college level mathematical topics that have a compelling relationship to pre college mathematics Mathematics for Secondary School Teachers provides a balance of discovery learning and direct instruction Activities and exercises address the range of learning objectives appropriate for future teachers Beyond the obvious goals of conceptual understanding and computational fluency readers are invited to devise mathematical explanations and arguments create examples and visual representations remediate typical student errors and misconceptions and analyze student work Introductory discussion questions encourage prospective teachers to take stock of their knowledge of pre college topics A rich collection of exercises of widely varying degrees of difficulty is integrated with the text Activities and exercises are easily adapted to the settings of individual assignments group projects and classroom discussions Mathematics for Secondary School Teachers is primarily intended as the text for a bridge or capstone course for pre service secondary school mathematics teachers It can also be used in alternative licensure programs as a supplement to a mathematics methods course as the text for a graduate course for in service teachers and as a resource and reference for in service faculty development
