Protection of Materials and Structures from the Space Environment Jacob I. Kleiman, 2006-07-13 This publication presents the proceedings of ICPMSE 7 the Seventh International Conference on Protection of Materials and Structures from Space Environment held in Toronto May 10 13 2004 The ICPMSE series of meetings became

an important part of the LEO space community since it was started in 1991. Since then the meeting has grown steadily establishing itself as the only North American event covering the various aspects of materials protection in LEO and attracting a large number of engineers, researchers, managers and scientists from industrial companies, scientific institutions and government agencies in Canada, USA, Asia and Europe, thus becoming a true international event. The ICPMSE 7 meeting continued the tradition of the previous meetings including in the program the topics on protection of materials in GEO and Deep Space. The conference was organized by Integrity Testing Laboratory Inc (ITL) and hosted by the University of Toronto's Institute for Aerospace Studies (UTIAS). The meeting was sponsored by the Materials and Manufacturing Ontario (MMO) and the CRESTech, two Ontario Centres of Excellence that from April 1, 2004 joined under the Ontario Centres of Excellence Inc (OCE Inc), a not-for-profit member-based corporation dedicated to establishing Ontario as the place to be for innovation in MD Robotics. The Integrity Testing Laboratory (ITL) and the University of Toronto Institute for Aerospace Studies (UTIAS). Over 80 people from countries covering the American, European and Asian continents registered for the conference representing the major space agencies and the major companies, institutions and government organizations involved in space activities, indicating a further increase in international co-operation in this critical area of protection of materials in space.
