Moving Forward in the Study of Temperament and Early Education Outcomes Cynthia L. Smith, David J. Bridgett, 2020-06-29 This book furthers understanding of how child temperament is linked to educational outcomes through mediating and moderating factors As the importance of socio emotional development for educational outcomes is increasingly recognized understanding the influence that children s temperament which includes their emotional reactivity and regulation of emotions cognitions and behaviors can have on educational factors such as school readiness and academic achievement is crucial First the chapters in this book examine pathways connecting temperament with educational outcomes for example one study reports that toddler negative affect predicted executive functioning which then predicted achievement at age six The second way that chapters in this book examine links between temperament and education is by identifying factors that make associations between temperament and educational outcomes more salient for example findings from one study show that shyness and negative emotion were more strongly associated with lower academic achievement only when children received fewer than nine hours of sleep each night highlighting the importance of sleep By examining pathways through which temperament exerts effects on educational outcomes i e mediators or factors that modify associations between temperament and educational outcomes i e moderators the potential for interventions aimed at improving early educational outcomes can be fully realized This book was originally published as a special issue of Early Education and Development

Logical Studies of Paraconsistent Reasoning in Science and Mathematics Holger Andreas, Peter Verdée, 2016-12-02 This book covers work written by leading scholars from different schools within the research area of paraconsistency The authors critically investigate how contemporary paraconsistent logics can be used to better understand human reasoning in science and mathematics Offering a variety of perspectives they shed a new light on the question of whether paraconsistent logics can function as the underlying logics of inconsistent but useful scientific and mathematical theories The great variety of paraconsistent logics gives rise to various interrelated questions such as what are the desiderata a paraconsistent logic should satisfy is there prospect of a universal approach to paraconsistent reasoning with axiomatic theories and to what extent is reasoning about sets structurally analogous to reasoning about truth Furthermore the authors consider paraconsistent logic s status as either a normative or descriptive discipline or one which falls in between and which inconsistent but non trivial axiomatic theories are well understood by which types of paraconsistent approaches This volume

addresses such questions from different perspectives in order to i obtain a representative overview of the state of the art in the philosophical debate on paraconsistency ii come up with fresh ideas for the future of paraconsistency and most importantly iii provide paraconsistent logic with a stronger philosophical foundation taking into account the developments within the different schools of paraconsistency
