

Write the letter for the correct answer in the blank at the right of each question.

- There are 15 plums and 9 apples in a fruit bowl. Find the ratio of apples to plums.
 A. 3:5 B. 3:8 C. 5:3 D. 8:3 1. _____
- The scale drawing of a porch is 8 inches wide by 12 inches long. If the actual porch is 12 feet wide, find the length of the porch.
 A. 8 ft B. 10 ft C. 16 ft D. 18 ft 2. _____
- Solve $\frac{5}{6} = \frac{4}{x}$.
 A. 4.6 B. 4.8 C. 5 D. 7 3. _____
- A quality control technician checked a sample of 30 bulbs. Two of the bulbs were defective. If the sample was representative, find the number of bulbs expected to be defective in a case of 450.
 A. 24 B. 30 C. 36 D. 45 4. _____
- Find the triangle similar to $\triangle ABC$ at the right.
 A.  B.  C.  D.  5. _____
- Find x if $\triangle ABC \sim \triangle JKL$.
 A. 10 B. 14 C. 25 D. 29 6. _____
- Quadrilateral $ABCD \sim$ quadrilateral $PQRS$. If $AB = 10$, $BC = 6$, $PS = 12$, and $QR = 4$, find the scale factor of $ABCD$ to $PQRS$.
 A. $\frac{1}{2}$ B. $\frac{3}{2}$ C. $\frac{5}{3}$ D. $\frac{5}{6}$ 7. _____
- If quadrilateral $ABCD \sim$ quadrilateral $EFGH$, find x .
 A. 15 B. 20 C. 25 D. 30 8. _____
- Which theorem or postulate can be used to prove that these two triangles are similar?
 A. AA B. SAS C. SSA D. SSS 9. _____
- Find MN .
 A. $5\frac{1}{2}$ B. $6\frac{3}{4}$ C. 7 D. 12 10. _____

precision manufacturing method The production of precision parts relies on three principles Production is robust i.e. all sensitive parameters can be controlled Production is predictable for example the shrinkage that occurs is acceptable because it can be predicted and compensated in the design Parts are measurable as without metrology accuracy repeatability and quality assurance cannot be known AM of metals is inherently a high energy process with many sensitive and inter related process parameters making it susceptible to thermal distortions defects and process drift The complete modelling of these processes is beyond current computational power and novel methods are needed to practicably predict performance and inform design In addition metal AM produces highly textured surfaces and complex surface features that stretch the limits of contemporary metrology With so many factors to consider there is a significant shortage of background material on how to inject precision into AM processes Shortage in such material is an important barrier for a wider uptake of advanced manufacturing technologies and a comprehensive book is thus needed This book aims to inform the reader how to improve the precision of metal AM processes by tackling the three principles of robustness predictability and metrology and by developing computer aided engineering methods that empower rather than limit AM design Richard Leach is a professor in metrology at the University of Nottingham and heads up the Manufacturing Metrology Team Prior to this position he was at the National Physical Laboratory from 1990 to 2014 His primary love is instrument building from concept to final installation and his current interests are the dimensional measurement of precision and additive manufactured structures His research themes include the measurement of surface topography the development of methods for measuring 3D structures the development of methods for controlling large surfaces to high resolution in industrial applications and the traceability of X ray computed tomography He is a leader of several professional societies and a visiting professor at Loughborough University and the Harbin Institute of Technology Simone Carmignato is a professor in manufacturing engineering at the University of Padua His main research activities are in the areas of precision manufacturing dimensional metrology and industrial computed tomography He is the author of books and hundreds of scientific papers and he is an active member of leading technical and scientific societies He has been chairman organiser and keynote speaker for several international conferences and received national and international awards including the Taylor Medal from CIRP the International Academy for Production Engineering *Report*, 1982

Geometric Morphometrics for Biologists Miriam Zelditch, Donald Swiderski, H. David Sheets, 2012-09-24 The first edition of *Geometric Morphometrics for Biologists* has been the primary resource for teaching modern geometric methods of shape analysis to biologists who have a stronger background in biology than in multivariate statistics and matrix algebra These geometric methods are appealing to biologists who approach the study of shape from a variety of perspectives from clinical to evolutionary because they incorporate the geometry of organisms throughout the data analysis The second edition of this book retains the emphasis on accessible explanations and the copious illustrations and examples of the first updating the treatment of both theory and practice The second edition

represents the current state of the art and adds new examples and summarizes recent literature as well as provides an overview of new software and step by step guidance through details of carrying out the analyses Contains updated coverage of methods especially for sampling complex curves and 3D forms and a new chapter on applications of geometric morphometrics to forensics Offers a reorganization of chapters to streamline learning basic concepts Presents detailed instructions for conducting analyses with freely available easy to use software Provides numerous illustrations including graphical presentations of important theoretical concepts and demonstrations of alternative approaches to presenting results

Optical Engineering Science Stephen Rolt,2020-01-07 A practical guide for engineers and students that covers a wide range of optical design and optical metrology topics Optical Engineering Science offers a comprehensive and authoritative review of the science of optical engineering The book bridges the gap between the basic theoretical principles of classical optics and the practical application of optics in the commercial world Written by a noted expert in the field the book examines a range of practical topics that are related to optical design optical metrology and manufacturing The book fills a void in the literature by covering all three topics in a single volume Optical engineering science is at the foundation of the design of commercial optical systems such as mobile phone cameras and digital cameras as well as highly sophisticated instruments for commercial and research applications It spans the design manufacture and testing of space or aerospace instrumentation to the optical sensor technology for environmental monitoring Optics engineering science has a wide variety of applications both commercial and research This important book Offers a comprehensive review of the topic of optical engineering Covers topics such as optical fibers waveguides aspheric surfaces Zernike polynomials polarisation birefringence and more Targets engineering professionals and students Filled with illustrative examples and mathematical equations Written for professional practitioners optical engineers optical designers optical systems engineers and students Optical Engineering Science offers an authoritative guide that covers the broad range of optical design and optical metrology topics and their applications

Vibration Fatigue by Spectral Methods Janko Slavič,Miha Boltezar,Matjaz Mrsnik,Martin Cesnik,Jaka Javh,2020-08-20 Vibration Fatigue by Spectral Methods relates the structural dynamics theory to the high cycle vibration fatigue The book begins with structural dynamics theory and relates the uniaxial and multiaxial vibration fatigue to

the underlying structural dynamics and signal processing theory Organized in two parts part I gives the theoretical background and part II the selected experimental research The time and frequency domain aspects of signal processing in general related to structural dynamics and counting methods are covered in detail It also covers all the underlying theory in structural dynamics signal processing uniaxial including non Gaussianity and non stationarity Finally it provides the latest research on multiaxial vibration fatigue and the non stationarity and non Gaussianity effects This book is for engineers graduate students researchers and industry professionals working in the field of structural durability under random loading and vibrations and also those dealing with fatigue of materials and constructions Introduces generalized structural dynamics theory of multiaxial vibration fatigue Maximizes understanding of structural dynamics theory in relation to frequency domain fatigue Illustrates connections between experimental work and theory with case studies cross referencing and parallels to accelerated vibration testing

Approaches to Studying the Enacted Mathematics Curriculum Kathryn Chval,Dan Heck,Iris Weiss,Steven W. Ziebarth,2012-09-01 Curriculum materials are among the most pervasive and powerful influences on school mathematics In many mathematics classes student assignments the questions the teacher asks the ways students are grouped the forms of assessment and much more originate in curriculum materials At the same time teachers have considerable latitude in how they use their curriculum materials Two classes making use of the same materials may differ markedly in what mathematics content is emphasized and how students are engaged in learning that content This volume considers a variety of research tools for investigating the enactment of mathematics curriculum materials describing the conceptualization development and uses of seven sets of tools Mathematics education researchers curriculum developers teacher educators district supervisors teacher leaders and math coaches will find insights that can improve their work and guidance for selecting adapting and using tools for understanding the complex relationship between curriculum materials and their enactment in classroom instruction

A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum Harold Schoen,Steven W. Ziebarth,Christian R. Hirsch,Allison BrckaLorenz,2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based

mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century
